VOLUME LXX., NUMBER 8. REDWOOD CITY, SAN MATEO COUNTY, CALIFORNIA, CALIFORNIA, FRIDAY, MAY 31, 1929. ESTABLISHED 1859

DUE HOMAGE PAID TO HONORED DEAD

City Lays Tribute on Graves of Those Who Gave Their Lives in Service of Their Country

Redwood City yesterday paid its homage to those who have given their lives for this country on the various battle fields where Americans have fought. In observance of the day, practically every store and office of business in town was closed and the town was decked with flags. In the afternoon an interesting Memorial Day program was arranged.

The program began with a selection by the Sequoia Union High School band. It continued with the following:

Opening remarks by E. B. Hinman.

"Logan's General Order No. [illegible]."

"Star-Spangled Banner" by audience.

"Gettysburg Address," by James [illegible].

Recitation by grammar school pupil.

Reading by Miss Inez Jamieson.

Vocal Solo by Miss Alma Collins.

Address by Paul McCarthy.

Prayer by the Rev. C. E. Winning of the First Methodist Church.

Then for the ceremonies at the the parade formed and marched to the cemetery. Included in the parade were a platoon of Redwood City police, the Redwood City fire department, city and county officials, members of the Grand Army of the Republic, Spanish War Veterans, American Legion, Sequoia High School band, Boy Scout troops, Girl Scouts of the Womens Relief Corps, Spanish War Veterans Auxiliary and Legion Auxiliary and Red Cross and grammar school children.

At the cemetery the prayer was offered by Rev. C. E. Winning, and an address to the unknown dead by Mrs. H. Stevens. Miss Inez Jamieson paid a tribute to Gen. Geo. H. Thomas. Post Womens Relief Corps. The ceremonies were followed by salute, taps and decoration of the graves.

Following the services at the cemetery the parade re-formed and marched to the Odd Fellows hall, where the Womens Relief Corps served refreshments.

The Memorial address at the hall was by Paul A. McCarthy said in part:

"Today we are met together again to commemorate the heroism of those who gave their lives for their country. In the words of the great orator, the late Robert Ingersoll, in his Reunion address after the Civil war:

"Today we remember the heroic dead whose blood reddens the fields and highways of honor; those who died upon the field in the front, in prison pens, or in famine's wake, those who gave their lives that liberty should not perish from the earth. And today we remember the great leaders who have passed to the realm of silence, to the land of shadow, and hundreds of thousands of privates who are equally worthy, and deserving of equal honor with the plumed leaders of the host."

"In extolling the honor to be accorded to the rank and file of the army, the marine and the navy, Col. Thomas W. Higginson said on this day in 1870 at Mount Auburn Cemetery:

" 'The great French soldier, La Tour D'Auvergne, was the hero of many battles, but remained by his own choice in the ranks. Napoleon gave him a sword and the official title 'First among the grenadiers of France.' When he was killed the emperer ordered that his heart should be entrusted to the keeping of his regiment—that his name should be called at every roll-call, and that his next comrade should make answer, 'Dead upon the field of honor.' In our memories are the names of many heroes; we treasure all their hearts in our affections, and when the name of each is called, we answer in flowers upon the grave, 'Dead upon the field of honor.' "

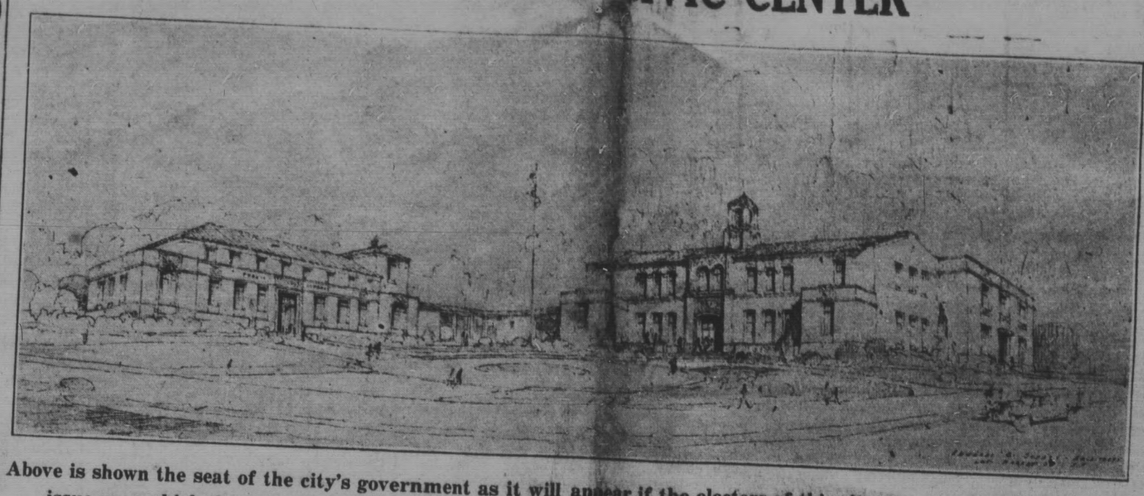
"Next to the death of the martyr who dies for his God and in testimony of his faith, the death of the soldier, the marine, and the sailor who gives his life for his country and for the security of his fellow citizen is the noblest act that can be performed by man.

"But today is also a Memorial Day for those of the living who, maimed in body and diseased in mind, are suffering a living death, destined to remain, many of them, for all the days of their lives in government hospitals and private homes and sanitariums because of the ravages of war and the hideousness of its diseases. What a splendid custom it would be for us who are near a government hospital to visit the patients there today! What a practical demonstration to these heroes that their heroism is still green in our memories."

"But primarily this is the day upon which the heroic dead of our wars are honored and their graves and the sea lovingly strewn with fresh flowers. Without distinction of nationality, of race, of religion, or of station in life, these heroes of our Civil War, of the Spanish-American War, and of the World War gave their lives to their country. Ours is the duty of preserving the ideals for which they died—liberty, national unity, representative government, maintenance of justice, respect of law and freedom of the seas.

"On this day each year we renew our aspirations for these ideals, we pledge again our devotion to these causes, we gird ourselves to the tasks handed on to us by the noble dead of past wars."

OUR PROPOSED CIVIC CENTER



Above is shown the seat of the city's government as it will appear if the electors of this city sanction the $65,000 bond issue upon which they are called upon to vote on June 11 At the far right can be see the present city hall as it will appear when remodeled for the use of the police and engineering departments. Next on the left is the new city hall, which will be ample to house the other functions of the city's government. On the far left is shown the proposed new library building which will be made possible through the sale of the present library site.

"Y" Camp Proves Popular Place For Young Boy

The application for reservations in Camp Yu-Mi-Ci-A, the Y. M. C. A. camp for boys in the San Mateo County Memorial Park, at this time exceeds all previous records.

Arrangements have just been made so that boys desiring a longer period than ten days may have the opportunity. A boy can now sign up for as long as forty days in this popular camp.

As has been the policy of the Y. M. C. A. in the past, boys who are not members of any Y. M. C. A. club group have the privilege of going to this camp.

With the camp fee at $10 for a ten-day period the committee feels that the camp is within the means of practically any boy.

Many new improvements will be noted in this year's camp. A larger play area has been cleared. Water is being piped from a large spring of tested water and a number of other improvements made.

The first camp period from June 17 to 27th is especially set up for boys from 12 to 15 years of age. A program of special interest to this adolescent age group is being prepared with a number of innovations. This camp period will be under the personal direction of R. W. Simcock and a group of picked older leaders.

The third period will be under the direction of Roy A. Hohberger, the local Y. M. C. A. Secretary, and will be for boys 8 to 12 years of age. This camp period program will be set up with activities having much of the Indian atmosphere which appeals so much to this age group.

The camp is strictly non-military. All activities are supervised. The camp government is unique being handled by the boys themselves.

The local committeemen are Wilbur Doxsee, John Gill, Earle Rich, Carl Wagner, John Fudge, C. M. Doxsee, W. B. Langston, D. W. Williams, Don Bogie, Otis M. Carrington and Henry Witte.

Further information relative to this camp can be secured by calling Roy A. Hohberger at Redwood 974.

JEWELS AND GEMS ARE TOPIC OF ADDRESS AT EXCHANGE MEETNG

Members of the Redwood City Exchange Club were given a talk Tuesday evening at the regular weekly meeting of the club by Prof. A. Rogers of Stanford Univerty. The subject of this address was precious and semi-precious stones, and Prof. Rogers made the subject a most interesting one, illustrating his remarks with samples of various minerals and picture slides.

The chairman of the meeting was John J. Garland, county milk inspector. Kendall Towne and Lindsey Gray, president and secretary of the local service club gave reports of the recent state convention which was held at Pasadena. At this convention Lindsey Gray was elected Sentry of the state body, in recognition of his efforts in Exchange. He has been secretary of the local club for several years and has been very active and prominent at the state conventions of Exchange in recent years.

Mr. and Mrs. A. Provost of Arch street, and Mr. and Mrs. Gus Erickson of Arlington road, motored to the Yosemite valley to spend the holidays.

K. of C. Plan For Tri-Council Picnic

On the 14th day of July, 1929, a gala time is expected when Palo Alto and San Mateo councils of the Knights of Columbus hold their picnic.

Owing to the keen rivalry that exists between the two councils in their athletic endeavors there is likely to be little calm during the day's excitement. While Daly City council has accepted the invitation to be present, it is not known at the time this goes to press whether or not that council will participate in any of the atletic events.

The picnic is to be held at the new Portola Park, in San Mateo county, an easy driving distance from either council. Situated in the beautiful Portola valley, seven miles off the state highway on the Portola road, going west on Santa Cruz avenue.

On the day of the picnic, a day not easy to forget, being the French Fourth of July, Sunday, July 14th, there will be signs displaying the route to travel at half-mile intervals leading to the park.

Junior Legion Team To Try For Championship

The American Legion Junior baseball nine will play the Burlingame Legion Juniors at Burlingame Sunday morning at 10:00 a. m.

In the first game played last week the Redwood lads were victorious, when they trimmed the Northerners by a score of 13 to 8.

Leo LeRoy Steller, pitcher for the locals, fanned nine men and allowed but seven scattered hits. Captain Frank Maloney at short stop, played a whale of a good game, handling numerous hard chances, without a bobble. Ken McNally, left fielder, was the heavy man with the stick for the day, collecting four hits out of five trips to the plate.

If the locals win Sunday's game they will have won the county championship.

According to predictions a large crowd will be on hand to cheer the boys along.

The boys are requested to meet at the corner of Broadway and the highway where transportation will be provided.

KIWANIANS TOLD OF TRAVEL CONDITIONS IN STRANGE PLACES

Travel was the subject of an interesting talk given before members of the Redwood City Kiwanis Club Wednesday by J. T. McClellan of the travel department of the Bank of Italy. McClellan's talk was so convincing that members of the club found it hard to return to work after the meeting and continued to dream of snow-capped Andes, the blue Mediterranean and the sacred shrines of India.

The chairman of the meeting was Donald W. Williams.

An interesting feature of the meeting was a solo by Tom Kane, manager of the Sequoia Theatre. He was accompanied on the piano by the organist of the San Mateo theatre.

Sidney Moore of the Nipa Hut, returned Monday from Pasadena, where he visited relatives and friends and attended the state convention of Exchange Clubs.

Keep the Town On the Up-Grade

EDITORIAL

In many sections of our country today are to found "ghost towns." A ghost town is a "deserted village" — a town that at one time was prosperous and flourishing, but today is uninhabited and its buildings and thoroughfares falling into decay — ghost towns — towns that failed to grow.

Perhaps the most outstanding examples of ghost towns are to be found in mining districts where the ore has run out, or in oil districts where the wells have been pumped dry, but there are also many others where lack of civic interest and cooperation has brought on community dry rot, and these once thriving communities have faded into oblivion with the passing years.

Another fifty years will bring to light many new ghost towns. Some communities seemingly prosperous today will then be dead communities —ghost towns—towns that failed to grow and develop.

Growth is a natural and healthy process. The best index to the prosperity of any community is its growth—a steady increase in the number of its inhabitants. A town or city that is not growing is lacking in one or more essential qualities. It is not a well rounded community.

The farmer knows that he must enrich his soil and cultivate it to insure the proper growth of his crops. The manufacturer must provide the right equipment and labor conditions to promote the growth of his business, and the citizens of a community must provide the essential factors of community growth if that community is to thrive.

The growth of a community must be developed and watched. While a bigger Redwood City is to be desired by its citizens, it is of equal importance that Redwood City should also be a BETTER community. It is this thought that is in the minds of the sponsors of the Community Development Campaign now being carried on in the Times-Gazette.

Remember that the ghost towns of America are deserted villages because their citizens bled the community of the prosperity so abundantly provided and put nothing back. Are you doing your share to safeguard the growth of Redwood City? Are you doing your part to make Redwood City a bigger and better community? Are you putting your share back into this community to help it grow and develop?

No individual should analyze a community propostion of importance from the angle of "to what extent will I personally be benefited." Should every individual of Redwood City assume such an attitude, it is needless to state our town and community would never be more than a wide place in the road—if it would be in existence at all.

It often has been stated a town or community that is good enough to live in is deserving and good enough to be boosted to the very utmost of our ability.

The community affords one not only the necessities of life, but pleasures' and luxuries as well, to say nothing of fellowship, encouragement and co-operation of every kind that make for progress and success.

We all owe it to the Growth and Progress of our town to do our share in helping it to grow and prosper.

Two Boys Given Highest Honors By Stamp Club

Two Redwood City boys, Byrne Pike and Marshall Hughes were awarded the "Kalos Philatelos" button at the final meeting for the season of the Sequoia Philatelic Society. This award is the highest that has been given thus far under the new system in the Y. M. C. A. clubs of this section which are set up to promote the hobby of stamp collecting.

The requirements for this award are based not so much on the number of stamps a boy or girl has, but rather on their knowledge of geography, history, observation, care and neatness, interest in world affairs, etc.

A number of members of this club have been put in touch with collectors in Jugo-Slavia, Czecho-Slovakia, Greece, Roumania, Serbia, and adjacent countries and have received some very interesting letters which have been read to the club.

This club is one of seven that are being promoted along the line of this hobby on the peninsula.

C. of C. Hears of Industrial Plans Of San Francisco

C. A. Fleming, industrial secretary of the San Francisco Chamber of Commerce, addressed members of the Redwood City Chamber of Commerce at the semi-monthly meeting of that organization on Monday on the possibility of locating an industrial airport here. The San Francisco commerce body is work, Fleming said, to locate such an airport here, and the Belle Haven people have agreed to a location on their property.

BABY BORN SHORTLY AFTER AUTO ACCIDENT

Attendants at the Mills Memorial hospital in San Mateo were given a surprise this week when a baby girl entered the scene of activities at that institution following an automobile accident. While crossing the highway in San Mateo Monday night, Mrs. C. C. McCabe of that city was struck by a car. She was taken to the hospital, where it was found that she had suffered a dislocated knee and a broken knee cap. A short time after Mrs. McCabe had been treated for her injuries the baby was born.

HOME OF A. HERM DAMAGED BY FIRE

The home of August Herm at 70 Central avenue, was considerably damaged by fire late Monday afternoon. The fire, which is said to be the result of a defective flue, resulted in damage to the house estimated at about $100.

The announcement was made last week of the engagement of two popular young people of this community. That of Lauis A. Behrens of the First National Bank and Mrs. Clara Bean, a teacher in the local schools. Both are well known and popular and are receiving the congratulations of their many friends.

The North Fair Oaks Improvement Club will hold a dance Saturday evening, June 1, in the auditorium of the Garfield School on the Middlefield road.

Mr. and Mrs. Wilbur Doxsee and children left for Yosemite Valley yesterday, where they will spend the week-end.

Party Visits Hetch-Hetchy Tunnel Project

A visit to the work camps on the Hetch Hetchy project in Alameda county was made last Saturday by a number of newspaper men and engineers of this county as guests of M. J. Bartell, assistant engineer in the office of M. M. O'Shaughnessy, city engineer of San Francisco.

The party was taken in cars over the Dumbarton bridge and visited the portal of the 29-mile tunnel, now under construction and which when completed will bring the water from the San Joaquin valley to the bay underpass at Dumbarton. The tunnel at this point has been driven into the mountain for more than half a mile.

Work on the tunnel is being divided into a number of sections. The portals are being made, one at each side of the mountain. At intermediate points shafts have been driven vertically into the mountain and from the bottom of these different shafts the tunnel is being driven in both directions.

It is the plan of the engineers that the eight sections into which the tunnel is being divided by the shafts shall be completed at approximately the same time. This requires extremely careful engineering work as the tunnel sections must join in both a vertical and horizontal plane.

The party was taken down into the Indian Creek shaft a depth of 750 feet. In this shaft an experimental tunnel has been constructed where engineers are trying out various types of concrete bulkheads and walls of various thickness to determine what type will prove most satisfactory for the concreting of the tunnel when completed.

The tunel when finished will be slightly more than ten feet in diameter and will be a circular cross section. In reality it will be a concrete pipe ten feet in internal diameter, twenty-nine miles long and driven through a range of mountains. It is estimated that this work will be completed in 1932.

The party was met at the Irvington portal by Carl Rankin, engineer in charge of construction, who assisted Bartell in explaining points of interest to the visitors.

Before returning home in the evening the party enjoyed a dinner in Livermore with Bartell presiding as host to the crowd.

Those who enjoyed the trip were A. B. Cargill of the Burlingame Advance; E. E. Bramble of the South San Francisco Enterprise; E. J. Halcrow, Belmont Courier; H. B. Cook, San Carlos Enquirer, J. D. Hedge, Redwood City Standard; William Vielhaurer, Redwood City Tribune; John Isaac, Times-Gazette; Charles Dimmitt, city engineer of Redwood City, and James James, former engineer of Burlingame.

Joseph Gibson and George Roberts, superintendent and assistant superintendent respectively of the local plant of the Pratt Low Preserving Co., made a tour of inspection this week of canneries along the Sacramento river and in the San

TWO ARRESTS PROMISED IN BOOZE DEATH

Woman Found Dead In Atherton Home After Orgy

An investigation of alleged road houses conducted in this county will result from the death Wednesday night of Mrs. Avilde Bell, whose body was found in her Atherton home Sunday. Evidence aduced at an inquest held here Monday indicated that Mrs. Bell had died as the result of a drinking orgy in which she and her husband participated on Wednesday night.

When questioned by District Attorney Swart, Bell told that he and his wife had been drinking heavily at the home of Ralph Dickinson at Menlo Park. They came home about 1 a. m. Sunday, he said in a taxi cab.

Unable to put his wife to bed because of his condition, and hers, he declared he left her lie where she had fallen on the floor. When he went to her again, he said, he found her to be dead, but did not notify the police for several hours. The authorities declare, however, that the woman had been dead from 12 to 24 hours when found.

Dickinson denied that Bell had purchased liquor at his place. Bell had not been there over the week end, he stated, as he had sold the place two weeks before.

Thomas F. Bell, the husband was held at the jail for investigation, as were also Dinckinson and Mrs. Anne Peterson, who, it is aleged, also sold liquor to the Bells. W. G. Risley, a taxi driver, who is said to have taken the pair to the resorts, was also booked for investigation. All were released when it was established that the death of the woman was the result of pneumonia, produced by the excess drinking.

Warrants were latter sworn to by District Attorney Swart charging Dickinson and Mrs. Peterson with criminal nuisance. At the inquest Bell testified that he always bought his liquor from Dickinson or Mrs. Peterson.

Both Dickinson and Mrs. Peterson have previous police records, according to the authorities. The former served a year in the county jail as the result of a brawl in which he is alleged to have beaten Jesse Secker of this city to death with the butt of a pistol. Both he and Mrs. Peterson have been involved in bootlegging and gambling cases, the authorities state.

Bell is one of the heirs of the noted Teresa Bell estate. The dead woman was his third wife, the second wife having succumbed to alcoholism several years ago.

Mrs. Jackie Rogers left yesterday for Texas, where she expects to remain for some time with her parents.

Mr. and Mrs. Charles Ward of this city are leaving this week on a motor trip to Kansas. They will be away for several months and expect to visit a number of points of interest in the middle west.

A "BANK" OF MONEY

WHEN our ancestors spoke of a bank they were not thinking of an institution, but of a fund of money, like the sand in a sand bank. The old Pennsylvania Bank was such a fund, raised to buy provisions for the starving Continental Army.

Today your bank is a solid, substantial institution operating strictly according to the banking laws and adopting every safeguard for your funds.

Your money will be safe here. We invite your account.

First National Bank
San Mateo County Savings Bank
Home Owned Banks

CALIFORNIA NEWS BRIEFS

About $3000 has been raised for a building for the Boy Scouts and Campfire girls at Campbell.

The annual field day of the Antioch High School Girls' Athletic Association is to be held Friday, May 31. It will be followed by a formal banquet.

Miller Chandler, former school principal, was elected police judge of Watsonville over three other candidates, including Lindsey Webb, incumbent. Mayor Carey H. Baker, City Treasurer Charles A. Palmtag, City Clerk Merrill Swisher and alderman were reelected.

A building permit was issued at Richmond for a new hospital to cost $75,000. The hospital will be a three-story fireproof structure and will provide fifty beds together with modern operating rooms, clinics, etc.

An edict has been issued by Del Noret county officials that visitors must not pick wild flowers along the highways. Two deputies have been appointed to protect the flowers.

The Pickwick Stages System has announced plans for construction of a new $30,000 office and shops headquarters building at Fourth and A streets, Eureka. Construction will be started in time for completion of the building in autumn, according to the district manager.

Luella Lofgren of Richvale stands champion speller of Butte county. The championship was settled by a county-wide match with representatives from forty-six city and rural schools taking part. Miss Lofgren won a $12 prize given by the Butte County Farm Bureau. Second place was won by Minerva Scott of West Liberty and third place by Chrystal Johnson of Rio Bonito.

The limit on abalones in Humboldt county was fixed at ten by a bill passed by the State Senate. Assemblyman R. F. Fisher is author of the measure sponsored in the upper house by Senator H. C. Nelson of Eureka. Nelson also secured passage of Fisher's bill relating to the use of crab nets in the Humboldt district.

Visiting San Diego to inspect a new site offered the Government for establishment of its army air depot, F. Trubee Davison, Assistant Secretary of War for Aviation, arrived at Rockwell Field by airplane and inspected the proposed site in the lower bay region.

Announcement was made recently by Statistician Victor C. Heikes, in charge of the San Francisco office of the United States geological survey, that hereafter Nevada will be considered a part of the California Division of mineral resources of the survey, being moved from the Utah division. The close relation of Nevada's mineral industry to that of California prompts the change. Statistics of mining in Nevada will now be kept in San Francisco instead of Salt Lake City.

The total capacity of completed petroleum refineries in the United States increased during the last year 259,160 barrels, or 8 per cent, according to figures released by the United States Bureau of Mines. California topped all the other states in amount of products produced. There are 413 completed refineries, slightly less than last year, but with a greater capacity. Fourteen more refineries, with a capacity of 99,000 barrels, are under construction.

Construction of a nine mile extension of the Pacific Gas and Electric Company's power and electric lines into the Henleyville district, southwestern Tehama county will begin in a few days. The new lines will serve an agricultural district and will provide nineteen ranch homes, the Henleyville Community Hall and the Henleyville Church with electric light.

Purchase of 40,000 square feet of land at Black Point, under the bluffs of Fort Mason has been announced by the city. The purchase was made from the Northwestern Pacific Railway for $31,000. The site will be utilized in connection with the city's aquatic park project. The purchase gives the city title to all land from the transport docks to the Golden Gate Ferry terminal.

The right to operate its stages across the Carquinez bridge on runs between San Francisco and the Oregon border has been granted the Pickwick Stages System by the State Railroad Commission. The company was ordered recently to operate via the Martinez-Benicia ferry, in conformity with the provisions of its certificate.

Officers of the Community Hotel Company at San Jose have announced that the financing of the $505,000 hotel is complete and construction will start within sixty days. The hotel will be located at Santa Clara and Notre Dame streets, ten stories high. Seven companies have applied for the lease of the hotel, it is stated. The money was raised through local subscription.

Provisions of the new immigration law which will apply especially to San Francisco include a ruling that alien seamen once deported from the United States will thereafter be denied all the landing privileges, John D. Nagle, commissioner of immigration revealed recently. Six months in the United States is allowed alien seamen who jump ship in this county. Hundreds who have overstayed are deported annually, Nagle estimated. Alien sailors, once deported, may be sent to a prison on a felony charge if caught on American soil again.

After extended battle on the floor, the Swing-Sharkey $30,000,000 bond act to help finance the Carquinez salt water barrier and Santa Ana river flood control was defeated in the Senate on a roll call of 39 ayes against 33 noes. The measure as a constitutional amendment needed 54 votes. Assemblyman Braford S. Crittenden and other members of the joint legislative water committee fought the proposal. They held that it was ill-advised in view of their decision to postpone action on the state co-ordinated water development plan as a whole for the next two years.

Construction work was started by Mercer Fraser Company on the new office and buildings of the California Highway Commission at Eureka. The contract price is $43,874.

Miles H. Young, formerly a ranger in Trinity and Lassen counties, has arrived in Chico to assume his duties as a State ranger in Butte county.

The $125,000 Wasco Union High School auditorium was dedicated recently. Ceremonies included addresses by Geoffrey Morgan, author and lecturer, and Henri Didot, French Consul in Los Angeles.

The city council has adopted a resolution taking the appointment of the chief of Hanford fire department out of the hands of the volunteer firemen, reversing a precedent of thirty years' standing.

Purchase by a group of Fresno men of acreage in the heart of the Kettleman Hills oil field and formation by them of a holding company to be known as the Huett Oil Company has been announced. The land, 160 acres, is situated just over the Kings county line and is about four miles distant from the two producing wells in the Kettleman field.

The "First California Air Tour," which will start simultaneously from Mills Field and the Oakland airport on June 1, has attracted scores of entries from licensed pilots in all parts of California. The purposes of the tour are to demonstrate the safety and reliability of modern aircraft and to stimulate public interest in aviation.

The State Highway Commission will spend more than $3,000,000 in the Ukiah district before the end of the present fiscal year, according to State Senator Fred Handy. Of this sum, $1,886,700 will be expended on the Ukiah-Tahoe cut-off from the Redwood highway to the Lake Tahoe road out of Marysville. The rest of the money will be spent in improving the Redwood highway between Cloverdale and Willits and reconstruction of the coast road through Anderson valley and Boonville.

The paper box factory of the Palmer-Chase Company, now located in Oakland, is to be moved to Richmond Annex within the year, providing the Annex site is rezoned from residential to light industry, it has been announced. The petition for rezoning is now being considered by the City Planning Commission. The Annex site is at Tehama and Monterey streets, near the Southern Pacific railroad.

Bringing concrete application of California's forwardness in fire prevention and forest and field protection the state recently received $90,000 federal moneys appropriated by Congress under the Clark-McNary act for watershed protection. This is the largest single gift of federal money for that purpose, State Forester M. B. Pratt announced.

Some valuable antique furniture, which came to California on a ship around the Horn, was taken out of an old shack at Auburn for the first time in eighty years. William Smith of old Millertown, a few miles distant, said the furniture had not been moved from its place since 1849. He had it removed for repair.

Crescent City's boom as a harbor was given added impetus when the Standard Oil Company applied for permission to lay a pipe line along the inshore side af the seawall and to construct a storage plant and pumping station on the shore end of the breakwater. It was reported the company plans to send gasoline and oil in tankers. It is now shipped in small tanks, an expensive method.

Laboratory tests of gas that is escaping at the rate of from 20,000,000 to 40,000,000 cubic feet every twenty-four hours from the Dudley well, six miles southeast of Kettleman City, have proved it comes from petroleum deposits. Active development of this new extension of the Kettleman field is now assured by the Dudley interests, and the drilling will be carried on to depths beyond gas reservoirs in an attempt to obtain high gravity oil.

What is admitted to be a preliminary step toward establishment of a municipally owned electric distribution system was taken recently when the city of Mountain View filed a complaint with the State Railroad Commission requesting that the Pacific Gas & Electric Company be ordered to supply electric energy to the city for resale to its inhabitants. The purpose in filing the complaint with the Railroad Commission is to prevent Mountain View from finding itself in the same predicament as Fairfield, where a distribution plant was built only to have the Great Western Power Company refuse to sell the city power. The group sponsoring the municipal distribution of electricity cites the figures of Redding, which show a net profit for the distribution plant of $236,000 since 1922, and lower rates to inhabitants than prevail in other communities. It also points to the successfully operated municipal water supply in Mountain View. The request to the Railroad Commission also asks that the rate which the city shall pay to the P. G. & E. for power be fixed by the commission.

Appointment of George P. Sanborn of Healdsburg as clerk of Sonoma county, to fill the unexpired term of William S. Coulter, who died recently, was announced by the Sonoma County Board of Supervisors. Sanborn was chief deputy under Coulter. He is expected to be a candidate for election in 1930.

The Empire-Star Mines Company at Grass Valley has sharply curtailed operations at the North Star mine, preliminary to prosecution of a more comprehensive development campaign. Production from the Empire mine is being gradually increased.

After a number of months of litigation, Judge Percy King, has given a decision in favor of the Spring Mountain Acres, Inc., and against the plaintiff, Mrs. Harriet C. Lanktree. The plaintiff sought to show that fraud had been used in obtaining a deed, which she petitioned the court to cancel. The action was based on property situated a few miles from St. Helena. The Spring Mountain Acres, Inc., obtained the property for development purposes, and the court held that no fraud was evident in obtaining the deed.

PICTORIAL GOLF INSTRUCTION

By H. B. MARTIN

Exercise to Develop Pivot

IF ONE wishes to learn the secret of good golf he should learn how to pivot. This means a good healthy exercise every night and morning. Stand before a mirror so you can watch the operation carefully. Place both hands on the hips. The feet are of course spread apart as in the golf stance.

Turn the body around so that the left elbow points directly out in front, then pivot completely around the other way so the right elbow is in front. Hold the stomach in. This is also very good for a reducer and will take off weight rapidly if anyone prolongs the exercise.

• • •

The Iron Club Sweep Is a Valuable Stroke to Master

IRON club play is little understood by the average golfer. This is true of most women players, who have the temptation to hit down on the ball instead of sweeping it. The ball should be carried away on the club as far as possible. If one will observe the play of the leading stars he will see that it is a simple, easy stroke without any apparent effort.

Everything depends on timing. The body should not be used in the swing until the ball is hit, and if one will remember to keep the head down he or she will come closer to making a successful shot each time. One thing is necessary, and that is to sweep the club toward the ball instead of attempting to hit directly down at it. If one gets into this habit he will soon learn the art of hitting a golf ball.

Clubs Should Be Used for Short Distances at First

A PRACTICE chart such as shown here is for the one who wishes to learn the use of the clubs for short distances only. Get in the habit of practicing a follow through in this manner and it will stick with the player when he tries the longer swing.

A good way to begin golf is to start with a putter learning how to hit the ball a short distance first. Gradually increase the distance as you become more proficient just as in piano practice. The dotted lines show the swing of the club. The ball is picked up about half way between the start and finish of the club.

Unpardonable Omission

A recent article enumerating those who have contributed to the emancipation of women failed to mention Mr Sholes or whoever it was who invented the typewriter.—Florence Herald.

Explained

It is now determined that four hours of hard thinking exhaust the tissues as much as ten hours of manual labor. Which explains how some of the chronic bridge players manage to keep physically fit.—Manchester Union.

Easily Evident

According to the Department of Commerce, the supply of nuts is adequate. Many incidents in the news of the day tend to support the department's finding.—Boston Transcript.

Answers Given Moot Golf Query

Jones and Hagen in Action.

The moot question, What is the most important shot in golf? has produced a number of different answers, all interesting and a couple of them clever.

Willie Park, a grand putter, said: "The man who can putt is a match for anybody."

To which Harry Vardon replied: "The man who can pitch doesn't need to putt."

And one witty sophist dodged the issue by saying that the most important shot in golf is always "the next one."

"The drive is the most important shot," said Walter Hagen. "It makes every other shot easier and harder."

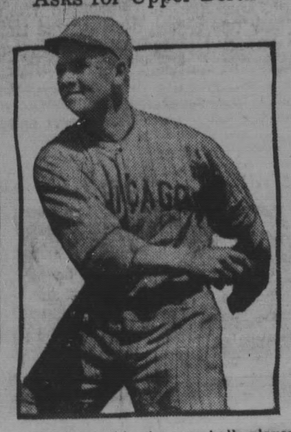
This is essentially a reasonable verdict, especially in these latter days of Gargantuan courses, with the second shot depending almost exclusively on the long and accurate wallop off the tee.

"You must reach the green before you can begin putting," is Bobby Jones' support of Sir Walter's theory; and if anybody should know the importance of the drive it is Bobby, especially since the United States open championship of 1928 at Olympia fields. His failure to win the championship, and, indeed, to win it by from two to eight strokes, is directly attributable to his inability in that tournament to keep his tremendous and usually accurate tee-shots in the fairway.

The long and accurate drive makes all the difference between a pitch to the green and a hard iron or a spoon shot, sometimes from a disadvantageous position, on many of the two-shot holes which nowadays constitute the potent factor of our championship courses. On the popular holes of 400 to 440 yards, a fine drive leaves a pitch or a medium iron, where a short or partly missed drive means a poke with the longer irons or a desperate bang with the wood.

Two-thirds of a modern championship course is built on the drive with the wood.

Asks for Upper Berth



Found: A big league ball player who begs to ride in an upper berth.

He's Harold McKain, the new White Sox pitcher. He made this startling admission when he asked Traveling Secretary Lou Barbour "if it would be possible, please," to change his lower berth on the train for an upper. "I sleep much better in uppers," young McKain said.

"In my many years in baseball," Barbour said later, "I've met many remarkable situations, but this is the first time I ever heard of a ball player, especially a recruit, who refused to have high 'ideas' and admitted he'd rather ride in an upper. Quite a few believe it is more comfortable up there, but won't admit it."

Pitcher Carroll Struck Out Four in One Inning

P. Owen Carroll, who led the Detroit pitchers in games won last year, achieved a distinction while pitching for Toronto that few pitchers in professional baseball win.

In the little world's series of 1926 between Toronto and Louisville Carroll struck out four of the Colonels in one inning. Owen took the first two without accident and cut the third strike over on the third batter. But his catcher permitted the ball to roll away with the remark: "That's all right; we'll get the next one."

Carroll bore down on the fourth batter and struck him out, too.

Max Bishop Anxious to Be Great Lead-Off Man

Max Bishop, regular second baseman for the Philadelphia Athletics, says his ambition is to become the greatest lead off man in the game.

"I want to set an all-time record for passes to first,' he remarked. "Last year I batted .314 and did a lot of free swinging, which shows I didn't wait out the pitchers as much as in former years."

Rival players have often said that the Mack infielder's eyesight is uncanny and umpires usually agree with him when he fails to swing.

Few Teams Win 100

Few teams ever win 100 or more games in a single season. And few teams have ever lost 100 games in a single season. The record for defeats is still held by Washington Back in 1904 the Washington team lost 113 games, the largest number ever lost by one team in a single season. Washington's defeats that year brought forth the crack: "Washington, first in the hearts of his countrymen and last in the American league race."

DIAMOND PICK-UPS

Ray Schmandt, former Brooklyn first baseman, is now playing with Canton in the Central league.

• • •

Abilene of the West Texas league has released Charley Martin, Russell Shamburg and A. J. Wedel, pitchers.

• • •

W. C. Comstock, well known minor league outfielder, has joined the Martinsburg club of the Blue Ridge league.

• • •

Henry Boney, rookie pitcher, has been sent to Bridgeport of the Eastern league by the Giants. This is a Giant farm.

• • •

"Monk" Younger, coach of the Davidson college baseball team, believes he has a stellar pitcher this spring in Doc Kugler.

• • •

Pitcher Ken Penner, who was with Houston last season, made his start for Indianapolis on April 19 and held Milwaukee to four hits.

• • •

But one tried veteran, Capt. Cal Macomber, is a member of the University of Vermont baseball team, the remainder being new talent.

• • •

Heinie Meine, righthanded pitcher purchased from Kansas City during the winter, has finally made terms with the Pittsburgh Pirates.

• • •

Counting in exhibition games and semi-pro games, 700,000 fans have passed through the gates at Birmingham in the last two years.

• • •

Ed Crowley, trying out for third base with Baltimore, is the same Crowley that played end for Georgia Tech. The Giants have given him a trial.

• • •

Brooklyn has taken on Joe Bradshaw, big righthanded pitcher, who served with Wilkes-Barre in the New York-Pennsylvania league last season.

• • •

Pacific coast experts are singing the praises of Frank Crosetti, young infielder with San Francisco, and say he is sure to go to the majors this year.

• • •

Pat Crawford, rookie first baseman with the New York Giants, hit three home runs in an exhibition game this spring, two of them coming with the bases fully occupied.

• • •

Charley Maxton, former University of Purdue hurler, had the better of the veteran Rube Benton in the game of April 19 as the Columbus Senators made away with a 5 to 2 victory over Minneapolis.

• • •

Besides a lot of money and real estate left to his widow, the late Jack Dunn also left to the Baltimore Orioles a youthful southpaw, Beryl Richmond, who he said some day, will be sold to the majors for $100,000.

• • •

When Slug Hoson of the Los Angeles Angels was spiked, Walter Berger, the kid outfielder, took his place at first base and appeared thoroughly at home on the bag, where he has played before.

• • •

Pitcher Lee Cox, with San Antonio last year, has been turned over to the Milwaukee Brewers of the American Association by the Chicago White Sox. His shipping label read, "on trial," or if he does not suit the Brewers comes back. If he sticks the Sox are to get $7,500.

GUY BUSH PLANS TO REFORM SELF

Will Quit Easing Up at Soft Spots in Pitching.

Guy Bush, more widely known as Joe, and sometimes referred to as "Mississippi Abe," is going to reform.

This information, however, isn't anything that will change his habits of living, for Joe adheres rigidly to all training rules and always gets to bed early.

In fact, Joe's self-made training rules leave nothing for a manager to desire. Still Joe says he's going to reform, writes Ronald McIntyre in the Chicago Journal. And he doesn't mean that he's going to quit selling bonds, his manner of making a living between baseball seasons. Joe says he's going to institute the reforms in his methods of pitching.

Heretofore Joe has had a habit of easing up when he thought he had a soft spot in an opposing batting order. Possessed of excellent speed and a good curve, Joe always was trying to develop a slow ball that would make him one of the outstanding pitchers in the league.

Now it was perfectly all right for Joe to work on his slow ball but there were times when he was pitching last season when he would have been much better off if he had postponed his experimenting until the morning practice of the next day.

Any number of instances might be cited to show that Joe used poor judgment when he eased up last season. One day, in particular, the Cubs were playing Brooklyn and Jess Petty was pitching against Bush. The Cubs had a one or two run lead and there were two out and two on when Petty strode to the plate. Bush didn't bear down as he had been doing and a single to right resulted and the score was tied. Later in the game, Petty got another hit that scored another run and the ball game went to Brooklyn.

Now Joe has been hearing of the trials and misfortunes that Dazzy Vance had getting established as about the best right hander in baseball. He has heard tell of how Vance toured the minors for years until he learned that his only trouble was that he was looking for soft spots in the lineup where he could slow up a little. Dazzy found out that he had to "bear down" all the time and when he did he became almost unbeatable.

And so—Joe Bush is going to reform.

Pole Vault Mark Tied

Robert L. Todd of Indiana university as he appeared in the Penn relay games at Franklin field of the University of Pennsylvania where he tied the pole vault of Sidney Berlinger of 12 feet.

SportNotes

A nice summer job for a doctor would be resident physician at the golf club.

PRINTING
Exceptional Facilities Enable Us to Guarantee Our Work
The kind you ought to have and when to have it, is when you really need it. We have contracted the habit of satisfying our customers. Our work is of the highest quality and our services are always at your instant disposal. We are especially prepared to turn out letterheads, billheads, noteheads, statements, folders, booklets, envelopes, cards, circulars, and many other jobs. Come in and see us next time you need something in the printing line.

OUT OF THE CURRENT

(©, by D. J. Walsh.)

DREAMILY Anetha arose from among the gay striped pillows of the swing, with her finger between two pages of the "Story of Philosophy," sauntered down among the peonies to the mail box in which she had a few minutes before uninterestedly seen the rural carrier deposit her day's mail. She scanned the headlines of the metropolitan daily she "took," then glanced at four envelopes which constituted the rest of the contents of the box. One contained the announcement of a church meeting, the second the village milliner's invitation to her "opening," the third a book list from a New York publisher. The fourth was only a "letter." It was addressed in the sprawling, distinguished chirography of her cousin's wife. Back again on the swing she read the letter.

"Anetha, dear, Mark has some things to talk over with you—business connected with your estate. He is just recovering from rather a nasty bout with flu, and he wondered if you might not be prevailed on to come here and save him a trip to Green Center. I'd love having you! For a week, a month, a year, as long as you could endure us. Oceans of things going on. How do you ever endure Green Center all the year round? Devotedly, Clarice. P. S. A dinner dress or two, a little sports costume and a street ensemble will be about all you will want in the way of clothes. Why not get anything you need here in the city?"

"The cream of the matter is in the postcript, of course," murmured Anetha. "Translated it would be, 'For goodness' sake have some decent clothes and don't disgrace me.'" She began tapping with her foot as she glanced over the letter a second time. "Must I go?" she asked, and then, staring with unseeing eyes over to a landscape that three minutes before had enchanted her with its Maytime loveliness, she answered her own question. She must go. And early yellow roses, peonies, new-leaved elms, an adorable slope of green lawn and a sparkling run fringed with bluets and spring beauties, lost for her all their savor. Her spring was spoiled.

She got up, picked up the pillows against which she had leaned, tucked the "Story of Philosophy" under her arm with letters and newspapers, and went into the still, sun-bathed house. She called up Miss Bertha and exacted a promise of three days' sewing. She wrote a brief acceptance of Clarice's and Mark's "most kind invitation." She dressed and drove the mile to Main street, bought the "little sports suits" and material for three dinner dresses. She tried on hats for an hour, selected three, went home.

Competently banishing sternly from her rebelling mind the glories of May, she was enforcedly ignoring, she went through the next three days supervising Miss Bertha, getting house and garden ready to leave for a week.

"You'll have a perfectly grand time!" fervently assured Miss Bertha.

Anetha shivered. She was trying on a dinner gown of soft black lace and at the shiver Miss Bertha waxed indignant. "'Course you'll have a grand time! 'Course, you will! And you sure deserve it. Didn't you stay home all those years with the old folks? There was your grandmother—she lived to be ninety-three, didn't she? Then come your father, 'n' then your aunts, Miss Alice an' Miss Mary. You deserve a good time if any one ever did!"

"But—but—I'm too old at forty-three, to adapt myself. You know, Miss Bertha, Mark and Clarice are college graduates; their friends are college graduates. They are educated, cultured people. I didn't go to the university that fall I planned to. Grandmother broke her hip, you may remember. I had about a year here at our little college before it was moved, and that's all, you see."

Miss Bertha scoffed. "You always got a book, I notice. An' you act educated. That's what counts. Say, now, that irregular hemline sets you off fine! You 'n' me got good ideas about the kind of things that looks right, if I do say it myself."

Thoughtfully Anetha regarded her slim reflection in the sewing-room mirror. "I couldn't bear to go and buy a lot of things in a great confusing strange store," she said. "But I may be making a mistake. Clarice will be distrait if I am not smart. Well, perhaps she will let me off from parties."

But Clarice did not let her off from parties. "My dear, your clothes have an air!" The city lady after one keen glance at Anetha in the black lace was exultant. "You are so individual, and yet you are right."

There were business conferences with Mark at first and then Clarice gave a dinner party in honor of "Miss Sinclair of Green Center." They went to luncheons, teas. Anetha at these felt as if she were reading a novel. And she confessed to Mark, "I've always been so out of life I am afraid to open my mouth."

"You needn't be," Mark observed with his bit of charming, dry smile.

The day came for the meeting of the Club of University Graduates.

"Do let me stay at home with Mark," pleaded Anetha.

"Oh, Anetha!" Clarice was tragic.

And so Anetha faced the lions. University graduates! Depressed, apprehensive, Anetha followed Clarice into the sumptuous hotel banquet room where these bright souls foregathered. Charming they were, their clothes, their voices, their bright welcoming glances, to Anetha's life-starved eyes. The subject for the day's meeting was a certain great novelist recently deceased. A pretty, but spent-looking woman read an indubitably learned paper. She candidly confessed at its conclusion she had had her husband's secretary copy parts of a recent magazine article. She was simply too rushed to get up a really good paper herself. She was almost tearful here. "Now, let's," she concluded more cheerfully, "have a general discussion. Everybody can say something about this writer, surely!"

A pause.

Then the president owned: "Well, I just don't remember a thing about him. Of course, I had him in college. But I don't have time to keep my studying up as I'd like to. There are so many meetings, so many worthy charities, drives, politics and so on, so many really important things."

"That's just the way it is with me," one said, then another.

Clarice came to the rescue of the discussion. "Anetha," she said, "I saw you reading one of this man's books last night. Tell us about it."

Hesitating, flushing, paling, Anetha began. Somebody beside her pushed her to her feet and after one miserable moment she went on. She had been deeply moved by this man's work, she said, and told why. She spoke of one book after another, its theme, its tragic beauty. She forgot herself, forgot her "lack of advantages," forgot the beautifully gowned women before her. She was in her own library again, reading, reading, while she stayed with the "old people." When she sat down—she did not feel at all "through"—gloved hands applauded, pretty eyes sparkled with admiration.

"I wish you had heard her!" bubbled Clarice to Mark at dinner that great day.

"I'm not surprised," Mark said. "I sometimes think it's we, being swept along in the middle of the current that are out of things. Anetha in the calm deep water at the side has a chance to swim and enjoy the view while she does it!"

"She's coming back to give a talk on Conrad next winter," Clarice announced happily.

"Did have a grand time, didn't ye?" Miss Bertha triumphed. "Educated! You want to be, an' you got th' time, so you are! Green Center ain't so bad!"

Why Not?

A certain restaurant famous for its excellent cooking and bad service was patronized by a middle-aged man and his little son.

They sat down at a table and picked up the menu. Having selected the dishes they fancied, the father looked around for a waiter, while his son endeavored to assuage the pangs of hunger by devouring bread.

At the end of five minutes' steady munching the small boy had exhausted his supply of bread and his patience, too.

"Daddie," he said, clutching his father's sleeve, "why don't you kick up a row like you would at home?"—Weekly Scotsman.

Always Follow Instructions

Sharpe (radio expert)—What on earth are you grinding up that copper wire for?

Dulle (radio novice)—Well, I'm putting in my radio set and the blueprint says a good ground wire is the most important thing about the installation.

Inquisitive New Maid

"Is Mrs. Rise at home?" inquired Mrs. Chatters, standing in the shadow of the doorway.

"I don't know, ma'am," the new maid replied. "I can't tell till I get a better look at you. If you've got a wart on the side of your nose, she's out."

Why He Was at Fault

Auto Tourist—I clearly had the right of way when this man ran into me, and yet you say I was to blame.

Local Officer—You certainly were.

Autoist—Why?

Local Officer—Because his father is mayor, his brother is chief of police, and I go with his sister.

The Fickle Mob

The mob has neither judgment nor principle—ready to bawl at night for the reverse of what is desired in the morning.—Tacitus.

Office Boy's Answer Suited the Manager

There's a question the manager of a large office suddenly propounded to each employee individually the other day:

"What would you do in case of fire?"

Almost every girl replied that she would run for the door. "And leave all these valuable business papers where they would burn up," thought the manager.

The men clerks were more brave. They seemed to agree that they would see that all the women were assisted out and then they would saunter down the stairs, or, perhaps, if the stairs were burned away by that time, they would jump into the life net from the windows.

"Yes, you would," soliloquized the manager. He then turned to the office boy. "What would you do?" he shot at him sharply.

The little fellow turned red and then offered, "I think if it wasn't too hot here, I'd grab that fire extinguisher over there and try to put it out."

"He won't be office boy much longer," says the office manager, "for as soon as he learns a little more about the business and grows a little older, he's going to be the manager's private secretary."—Springfield Union.

Daddy?

A new chaplain was approached one night at dinner in the officers' mess by a vapid young subaltern who asked him if he would baptize two pups.

The mess listened in silence, eager to see of what stuff the chaplain was made, and how he would take this insult.

The chaplain said he would comply with his request if he might baptize the pups there and then.

As the subaltern lifted up the pups, the chaplain inquired, in the conventional way, "Are you the father of these pups?"

Here Is the Famous Hoover Tennis Cabinet

Members of the "Hoover Tennis Cabinet," who meet almost daily on the courts in the south grounds of the White House at Washington, posing for their first photograph. Left to right: Commander Joel T. Boone, White House physician; Secretary of State Henry L. Stimson, Assistant Secretary of the Treasury Carl Schuneman, and Dr. Leo S. Rowe, director of the Pan-American Union.

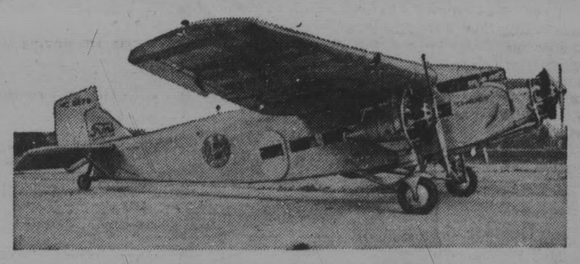
Memorial to First Poison Gas Victims Unveiled

View of the ceremonies at Ypres, Belgium, attending the unveiling of the memorial to the memory of the members of the Four Hundred and Eighteenth Belgian regiment, the first to die by poison gas during the World war. Representatives of the allied powers were present.

Novel Feature for Shriners' Pageant

Illuminated orange trees for the motion picture electrical pageant which will climax the fifty-fifth annual Shrine convention in Los Angeles in June.

Airplane Aid to Big Business



Industrial organizations have learned by experience that the ownership of passenger airplanes for the use of their executives is of immense benefit, especially in the way of saving time on business trips. One of the pioneers in this line was the Standard Oil Company of Indiana, which put its first plane into operation two years ago. According to announcement by Allan Jackson, vice president, speaking for the directors, that corporation has now replaced the plane with a larger and faster machine supplied by the Stout division of the Ford Motor company. It is an all-metal, tri-motored plane carrying nine passengers; has a total of 1,230 horse power and a high speed of 140 miles. Stanolind II, as it is called, acted as flagship of the St. Paul Association of Commerce's "good will tour" to Winnipeg, carrying members of the city council.

It is found that more than one-sixth of automobile accidents in 1927 occurred on Saturday.

All the continents of the world produce some sort of fur pelts useful for clothing purposes.

SULTAN OF ZANZIBAR

A recent portrait, one of the few ever made of him, of his highness the sultan of Zanzibar, who will soon be in London as the guest of the Imperial government. The sultan will be accompanied by his son Prince Abdullah.

GLENNA WINS AGAIN

Glenna Collett, American tennis star, won her way to the final round of the British woman's championship at St. Andrews by defeating some of the best players of England and Scotland.

Mere Man

Henri Daube, French painter, was speaking in cynical mood about the modern woman: "Nowadays, a lady's male acquaintance takes precedence in this order—her friend, her suitor, her dancing partner, her bridge favorite, her barber, her husband."

Evil in Disputation

The pain of dispute exceeds by much its utility. All disputation makes the mind deaf, and when people are deaf I am dumb.—Joubert.

POULTRY

PASTURING GEESE ON CLEAN RANGE

As General Rule Fowls Are Given Freedom of Field.

The raising of geese has not been specialized like duck raising, for the reason that geese secure most of their feed by grazing. For this reason, geese are raised on most farms in comparatively small flocks. These facts are the principal reasons why geese raising offers an opportunity for most farmers to add another source of income to their spring poultry raising.

Geese may be pastured at the rate of 60 head to an acre, but, as a general rule, they are given free range. This is satisfactory so long as they are not numerous. However, if a large flock of geese is pastured on the regular pasture the live stock will not relish the pasture on account of the goose manure on the grass. Ordinarily, the number of geese raised on any one farm are not numerous enough to cause any trouble from this source.

Geese do not require a great deal of attention. After the first two weeks they are able to look after themselves if given a good range. The principal food of geese is grass, supplemented by insects and other low forms of animal life. If suitable range is not accessible it is not advisable to go into geese raising.

Houses that will protect the geese from rains in summer and from snow, cold winds and dampness in winter are the only essentials from the housing standpoint. Low, open front sheds are often used for this purpose. Care should be taken to see that the interior of the house is dry at all times. Geese like to swim and they will exercise in the snow practically all day, but they should have dry places to roost or they will contract rheumatism. The floor of such houses should be of earth. This should be covered with straw and renewed often enough so that it will be dry. A thin coating of sand often proves helpful in keeping the house dry.

Geese mate more successfully after they are two years of age than when mated earlier. This is more true of the females than of the males. Occasionally yearling geese will produce fertile eggs, but they cannot be depended upon. Small, undersized geese should not be used for breeding purposes. On the other hand, extra large, coarse geese are not as satisfactory as those of full development, but not so coarse. With most breeds the gander will mate with from three to four geese.

Ohio Station Advocates All-Mash Chick Ration

The rearing of chicks to maturity on an all-mash ration is a rather new venture in poultry keeping, and we shall have to take the word of those who have tried it as to its value. This system has been developed and advocated by the Ohio agricultural experiment station, at Wooster, and is fully described in a bulletin issued by this station. They state that they have found the method successful on their experimental farm and equally so in the hands of other poultrymen of the state. Some other stations, where it has been tried, discount these claims somewhat. There is no question as to the attractiveness of the plan and the results at the Ohio station should be sufficient to give warrant for trying it out.

Those who have followed the teaching of poultry experts over a considerable period of years have learned that there is little that can be considered as absolutely fixed, even in the seemingly fundamental principles of feeding and care. Revolutionary findings are apt at any time to upset long accepted practices. The all-mash ration should not have scratch grains added to it, since it combines in itself both the scratch and the mash and the addition of more scratch grain would unbalance it. That is, it would change the proportion of protein foods to the other ingredients and presumably lessen its value. An all-mash should be more coarsely ground than other mashes, to make it more palatable.

Raising Turkeys

Turkeys can be raised by artificial methods with less loss and more profit than by the hen-hatched and hen-brooded method. Each year the matter of growing more than 20 or 30 per cent of the poults has become more difficult. That the association of turkeys and chickens is one of the leading causes for the heavy losses in baby poults and that turkeys can be raised in brooders and hatched in incubators are comparatively new developments in the turkey situation.

In Case of Roup

Should any of your flock begin to show symptoms of roup, no time should be lost in starting measures to prevent further spread. All houses, pens, coops and runs should be thoroughly cleaned and sprayed with a strong solution of a good coal tar dip and disinfectant. Droppings, litter and trash of every description should be removed and burned. All unnecessary equipment of every kind should be removed from houses and yards and stored elsewhere.

Control Cannibalism

Cannibalism in pullets can be partially controlled by darkening nests. "Pick-outs," which is a term used when birds eat at the oviducts, is often started when a bird is on the nest. Some birds acquire the habit of standing at the nest, and while the egg is being delivered they will attack the hen on the nest. If the nests are darkened the laying hen is in seclusion and the cannibal hens are not likely to attack her. A good plan is to kill the cannibals.

Makes Life Sweeter

Next time a coated tongue, fetid breath, or acrid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips. Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

Mistletoe's Growth

The life history of the mistletoe is just like that of any flowering woody plant. It bears flowers; in due time the berries follow, each with its inclosed seed; the berries are deposited by birds or beaten down by rains upon the branches, where the seeds germinate, and if the seeding becomes established upon the branch it grows again to the age of producing flowers and seeds, and so on from generation to generation.

French Police in Armor

Plain-clothes policemen in Paris are being equipped with a kit of folding armor for protection against bandits, says Popular Mechanics Magazine. The outfit consists of a steel headgear and a sheet of steel that serves as a shield in case of a battle. In addition, they wear bullet-proof vests.

Satisfying the Child

Lily—I want a donkey ride—I want a donkey ride.

Mother—John, just take her on your shoulder so that we can have some peace.—Le Rire (Paris).

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Advisory Board on Education Recommended

THE appointment by the President of an advisory committee on education to work out a program to be recommended to Congress, which would permit the Federal Government to render the greatest possible degree of service in the field of education, has been asked by Secretary Wilbur, of the Department of the Interior.

He believes that such a committee should be made up of representatives of the greatest educational organizations and of others interested in this field, and that it should meet in Washington for consideration of all phases of the subject.

Secretary Wilbur believes that in this way the proper field for national service for education under the Government can be worked out and definite recommendations made. Another problem which the committee would be asked to study would be that of bringing together all the educational forces in the national government which are now in existence, under an assistant secretary or undersecretary of one of the departments.

It is believed by those who are advocating the establishmet of a Department of Education with a Secretary in the President's Cabinet that, in spite of Secretary Wilbur's statement made recently that such a department was not needed, from his recommendations to the President in regard to the advisory board it could be implied that he does recognize that there is a need for some plan by which the national government can aid in furthering the educational activities of the nation. The appointment of the advisory board with an under-secretary in one of the Departments could be considered a step towards the establishment of the Department of Education.

The Million Dollar Line

"Always be courteous. Don't worry about the tip. Try to humor your customer. Send him away with a smile. Don't talk too much, but, if you must talk, talk intelligently. Read the editorials in the newspapers, and be generally informed on the topics of the day, so that you can engage in an interesting and intelligent discussion of them.

"The foregoing are the maxims which a man who has acquired the reputation of 'millionaire barber' has laid down to those who are to succeed him. They are based on an intimate knowledge of human nature such as only one who has been close to its possessors can enjoy.

"For many years the loquacity of barbers has been proverbial. Yet few barber shop customers care to be shaved in silence. The chit chat of the man who wields the razor is to be talked to and to talk back. And, if, while the razor is passing over their chins or the scissors over their pates, they can exchange ideas on the Einstein theory or the political outlook, they feel that the time they have spent in the chair is not entirely wasted.

"The millionaire barber would still have been only a journeyman if he had not understood human nature. But he knew that his customers liked to listen a little and talk a great deal. So he 'gave them their head,' agreed with them, respected their opinions and now and then questioned them sympathetically. And because he was wise and responsive he amassed a fortune. With no surrender of his self-respect, but only a wise insight into human nature, he made a real success of a calling which is ordinarily esteemed lightly. He made hair cutting and shaving a profession instead of a trade, and he well earned the fortune that it brought him."
—New York Herald Tribune.

Possible to Exclude Aliens from Count Without Amendment

DURING the latter part of the 70th Congress and the present short session, the question of excluding aliens from the count in reapportioning the House of Representatives has been frequently discussed and received much favor. It has been contended that it would be necessary to have an amendment to the Constitution to take such action.

In a speech recently Representative William A. Ayres, of Kansas, pointed out many reasons why such a amendment would not be necessary in order for Congress to exclude aliens in a reapportioment of the House. He contended that as the Constitution was silent on this particular point it was within the power of Congress to pass legislation which will clearly fix the status of persons to be counted in ascertaining the population to be used as a basis for apportionment.

"There is also power," the Congressman stated, "conferred on Congress by implication which must be resorted to by Congress in order to carry out the general grant of power, and that is to pass legislation that will further protect each and every State in the apportionment of Representatives in Congress. There is but one method by which this can be done and that is to pass legislation excluding all persons not naturalized in each state when making the apportionment. It is contended by some that this cannot be done because of being unconstitutional. My answer is that Congress has the power so long as there is no constitutional provision against it."

The Scientific Specialist

THE day of the specialist is here. More and more as human knowledge expands we realize that it is impossible for to know in one particular field.

A few years ago Baron von Humboldt wrote on Nature. He wrote on oceans, forests, volcanos, comets, fish, birds, in fact, the whole range of natural phenomena. Had he lived today he would have found science so much more complex that he would, in order to be considered an authority on anything, have had to devote his whole attention to some particular aspect of nature and would have found little time for study of other phenomena. As a contrast to von Humboldt who wrote on everything, we have today men like Professor Millikin who is spending his life in the study of one particular type of wave motion, the cosmic ray.

The all-around naturalist will always exist, for there will always be men whose minds seek a grasp of the whole scheme of things; but as knowledge increases in every field, the all around naturalist will, like the jack of all trades, figure less and less in the advancement of science. Yet he will in his own quiet way enjoy the fruits of the specialist's labors, fruits which the specialists by his very specialization and limitation of field may fail to enjoy.

FOURTH ESTATE IN NORTH WEST TOUR

By D. E. O'KEEFE

"Hello, Modoc!"
"Hello Del Norte!"

It was in this manner than the members of the California Press Association, while enjoying their 41st annual excursion, exchanged greetings with the hospitable people of two counties that have for many years, been regarded as the Hinterlands of California but which are now, at long last, being brought into closer fellowship with the other counties of the state.

New Southern Pacific Route to East

Leaving San Francisco Thursday, May 9, the members of the party traveled by special Southern Pacific train to Wendel, on the main line in Nevada, thence via the Nevada, California and Oregon railway to Alturas, county seat of Modoc county The N. C & O., formerly a narrow gauge road, now owned by the Southern Pacific, has been broad-road will enable the Southern Pacific to reduce the distance from Klamath Falls and points north, to the east by nearly 200 miles. The gauged its entire length to Lakeview, Oregon. It is over these rails that the Southern Pacific Co. will operate its trains from the northwest to the east via Ogden when its new line, now building from Klamath Falls to Alturas, shall have been completed. This new construction of 96 miles of new broad-gauge project involves the expenditure of $6,000,000 by the Southern Pacific Company.

Surprise Valley In Modoc Visited

At Alturas the editorial party was met by the citizens of that city and transported by automobiles to Cedarville, a distance of 35 miles over a splendid highway—a highway, by the way, that will some day be part of a state highway that will be a comparatively snow-free route to the east. Cedarville is the heart of "Surprise Valley," a cup-like valley surrounded by a mountainous region and very fertile. Here the party were the guests of the good people of the valley at lunch, at which hospitality was the key-note.

Alturas Now A Thriving City

Returning in the evening to Alturas, the members of the party inspected the plant and mill of the Pickering Lumber Co., which will, when completed, give employment to several thousand men. The activities of the Southern Pacific in the region will make Alturas a division center. It is no wonder, therefore, that Alturas is enjoying rapid growth, the population having doubled during the past two years, with the end not yet in sight. One of the most delightful events of the journey was the banquet tendered the editorial party by the Alturas Chamber of Commerce.

600-Mile Ride In Gray Line Busses

Saturday morning, the 11th, the party's special train reached Lakeview, Oregon, "the end of the rails." After breakfast at Hunter's Hot Springs, where the water, as it bubbles from the ground (or spurts geyser-like, 50 feet in the air) is so hot that it is used to heat the hotel, the party embarked in Southern Pacific Gray Line busses for Medford, Oregon, via Klamath Falls. The journey of more than 200 miles was made at a minimum of discomfort and with perfect safety

Cave Men Put Grants Pass On Map

After a restful night at Hotel Medford, the party motored (still in Southern Pacific Gray Line stages) to Grant's Pass for breakfast. Here the party was met at the Chamber of Commerce building by groups of citizens and the municipal band. After seeing the exhibits of the Chamber of Commerce, showing the wide variety of products of the region, breakfast was enjoyed in the "cave room" of the hotel. Prominent participants in the entertainment provided were the Oregon Cave Men and Cave Women, who have put Grant's Pass on the map—distinctly and unquestionably on the map, not only in Oregon but of the nation. The editors were cordially welcomed and greeted and speeded on their way by the citizens of Grant's Pass in a manner that left a most favorable impression on the minds of the scribes and scribees.

Thrills and Wonders In Oregon Caves

The next stop was at the Oregon Caves. The road to the caves leaves the Grants Pass-Crescent City highway at Kirby, the caves being 55 miles from that place and over good roads. The last few miles of the journey is over a splendid mountain road having a maximum grade of 6 per cent. The members of the party, each provided with a carbide lamp, explored the caves, traveling over a mile underground. The experience was a novel one and there were plenty of thrills, as well as wonders. In the Ghost Cavern, a vast amphitheater, 3,500 feet underground, all lights were extinguished, leaving the party in complete darkness. Then a spotlight played about the cave, disclosing Oregon Cavemen perched upon boulders and ledges about the sides of the subterranean temple

Cave Men Ceremonies In Oregon Caves

There followed the mystic rites of the cavemen and an oration by the high priest, who quelled a terrific disturbance of the elements, marked by lightning and thunder, by the process of waving the cave man's symbol—the jawbone of a supposedly pre-historic animal. The Oregon caves are well worth seeing, and those who travel the Redwood highway will be well repaid by a journey thence The caves were discovered in 1878 and are under the supervission of the federal government. There are cabins and a restaurant for the accommodation of the public.

Scenic Beauties Of Redwood Highway

The journey from the caves to Crescent City, a distance of about 100 miles, was over a wide, safely-traversed highway, and through one of the most beautiful regions in all the world. An attempt to describe the scenic grandeur of this portion of the journey is not possible to this scribe See it yourself, dear reader, ad you will find yourself in a like predictament

The Rejuvenation Of Crescent City

Just before sunset on Monday, May 13th, the party arrived at Crescent City, where, at the splendid new hotel (the existence of which many of the party were in ignorance) were feted at a Chamber of Commerce dinner. By reason of the building a number of years ago, during Governor Richardson's administration, of the bridge across the Klamath river at Requoa, and by reason of the improvement of the Redwood highway north from that point, Crescent City has awakened from a Rip Van Winkle sleep, and is blossoming forth like a watered desert rose. Streets are being improved, the beach is being converted into a paved esplanade, new building are going up and the little city in California's most northern county is, at last, coming into its own. The federal government is spending a lot of money building a safe harbor for ships of all tonnage. The provincialism that has retarded the city's growth is being shaken off and the citizenry is being molded on the basis of unified co-operation for progress. Travelers who spend the night at Crescent City, at the city's new hotel or at one of the many auto camps, will be assured of comfort and all the conveniences to which they have been accustomed.

A Hold-up On The Redwood Highway

Leaving Crescent City on the morning of the 13th, the party was halted by representatives of the state board of agriculture, who are on watch for carriers of the Mediterranean fruit fly It appears that Oregon is not as vigilant as is California in regard to the pest that is causing the destruction of hundreds of acres of fruit trees down in Florida Fruits from Florida, particularly grape fruit, are still allowed to enter Oregon and the California authorities are seeing to it that none of this fruit is permitted to cross the Oregon line.

The journey down the Redwood highway to Eureka (still in Southern Pacific Gray Line busses) a distance of 93 miles, was made in perfect comfort and safety, the highway being wide and of easy grades There was a repetiton of the scenic grandeurs that marked the journey from Grants Pass southward, a description of which the writer again passes along to someone with superior descriptive powers.

Two Restful Days At Eureka

At Eureka the party spent two restful days, despite the desires of the good people of Eureka, including Editors Bull and Georgeson and Crothers of The Times, to smother the visting scribes with an elaborate entertainment program. A launch ride to the jetty, which is well along toward completion, and a visit to the life-saving station, proved a welcome and restful diversion. The life-saving crew staged a demonstration of "rope shooting" and showed how their lifeboats are operated under adverse weather conditions, to the very enjoyment of the visitors.

Gov. Richardson Given 27th Term

At Eureka Inn, on the 14th, the annual meeting of the Press Association was held and former Governor Friend W. Richardson was elected president for the 27th consecutive term. He has served the members so efficiently and faithfully during all these years that no member of the association has ever sought to succeed the former governor as president He has said on many occasions: "I would rather be president of the California Press Association than governor of California." Governor Richardson and Mrs. Richardson, as usual, were the party thruout the journey and were showered with honors and courtesies wherever stops were made. All the other officers of the association were re-elected.

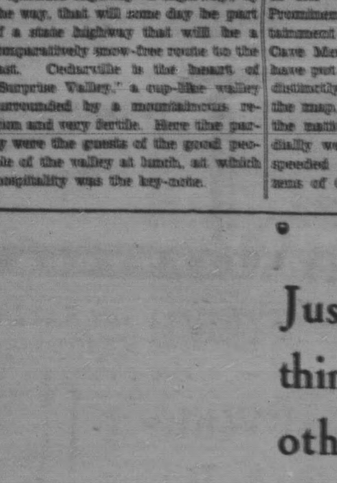
Home Again and Farewell Mr Kelly

On the 15th, a special Northwester Pacific train carried the party in record time from Eureka to San Francisco, where leave was taken of R E. Kelly, an official of the Southern Pacific Co. Mr Kelly endeared after the comfort of the ers in such manner as to leave nothing to be desired, including derful lunch at the camp at Merrill, where Richardson drove a golden marking the completion Southern Pacific's Klamath Alturas connection to that

This year's visit to Modoc Norte counties leaves no part state unvisited by the Press Association, whose believe in the virtues of the "Know your state," and knowing."

Just another good thing added to the other good things of life

CAMEL CIGARETTES



WHY CAMELS ARE THE BETTER CIGARETTE

Camels contain such tobaccos and such blending as have never been offered in any other cigarette.

They are made of the choicest Turkish and American tobaccos grown.

Camels are always smooth and mild.

Camel quality is jealously maintained . . . by the world's largest organization of expert tobacco men . . . it never varies.

Smoke Camels as liberally as you choose . . . they will never tire your taste.

Nor do they ever leave an unpleasant after-taste.

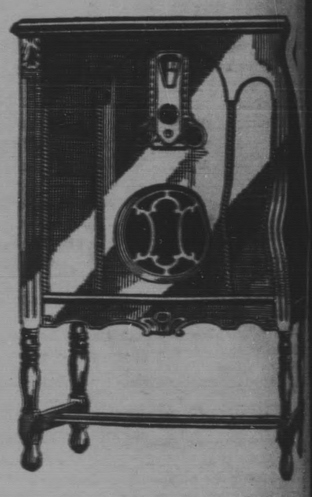
The New Stewart-Warner 900 Series

the all-round Champion
Champion of the air—
Champion of Distance—
Champion of Selectivity—
Champion of Tone—
Champion of Volume—
Champion of Beauty, too!



Jacobean Period Console
$172.50 complete

The most astounding array of features, the most amazing assemblage of precision parts, the most advanced group of engineering ideas ever brought together in a radio set at any price:

NEW BALANCED BRIDGE CIRCUIT eliminates all oscillation. No suppressors (which absorb part of the signal strength) are used. Therefore all energy received is transformed into audible sound. And distant stations come booming in like local reception.

PLUG-IN FOR TELEVISION: Unique in the industry, this feature insures against the Stewart-Warner becoming obsolete within the next five years.

22-CARAT GOLD plating on all electrical connections.

BUILT-IN LIGHT SOCKET AERIAL for local reception and connections for various lengths of antenna.

DRAWN COPPER SHIELDING houses the four radio frequency coils.

8 TUBES including rectifier.

HIGH SAFETY FACTOR: Both filter system and power transformers are to more than double the voltage they will ever be required to handle.

AUTOMATIC VOLTAGE CONTROL takes care of line voltage variation from 100 to 130 volts with no adjustment whatever and perfect reception throughout this range.

CONNECTIONS FOR PHONOGRAPH—rendering recorded music on a par with most expensive electric phonographic instruments.

CRYSTAL CONTROLLED OSCILLATORS, such as are used by the large broadcasting stations licensed under the Federal Radio Commission to keep on their exact wave lengths, are used to hold the tuning coils and condensers of this set to absolute accuracy.

ILLUMINATED "VISIBLE ANGLE" DIAL set at a 30-degree tilt gives perfect visibility, calibrations standing out in bold legibility when pilot is snapped on. Scaled both in kilocycles and 0 to 100.

THE COMPLETE STEWART-WARNER LINE includes Table Models, finished either in hammered gold bronze or jade green and ivory black; Consolettes in same finishes as Table Models; Walnut and Lacewood Consoles in Jacobean and Sheraton period design by the Louis Hanson Co., Chicago, and the new Stewart-Warner Dyphonic Speaker. The prices range from $89.75 to $170.50 (less tubes).

Woodside

The Woodside Fire Department had its first real test of the season on Tuesday afternoon. The beautiful home of D. W MacDonough at Ormondale ranch caught fire at the roof. The fire department covered the five miles of distance in record time and succeeded in confining the fire to the upper story of the building. Both personnel and apparatus of the department worked with the precision that inspires confidence for the fire-hazardous months to come.

Mr. and Mrs. Prentiss Cobb Hale gave a large bull's-head breakfast on Sunday at their place here. Major General and Mrs. John A. Lejeune of Washington were the guests of honor, and fifty-six friends were entertained.

Mr. and Mrs. W. S. Bigelow have taken the W. D. McCann place on the Canyada road for the summer.

Mr. and Mrs. Alfred B. Swinnerton and family have moved into their newly completed home at the corner of Albion avenue and Manuella road.

Mrs. A. Goularte and her son, Joe, have gone to Santa Rosa for the holiday and week-end.

On Monday evening, Miss Phillipson, regional director of the Girl Scouts, will show moving pictures of Girl Scout camp life and will give a description of the camp at Deep Woods. It is hoped at this time to make plans for the participation of the local organization of Girl Scouts in the coming summer's camp activities. The meeting will be held at the Parent-Teacher Association Hall.

On Thursday next the Parent-Teacher Association will hold their annual luncheon at which time the officers for the ensuing year will be installed. The luncheon arrangements are in charge of Mrs. George Givens.

Mrs. Herbert Gallagher, who has been at her home here for several weeks, will leave shortly to spend the summer at her home on one of the famous Thousand Islands in the St. Lawrence river.

COOK JAILED AFTER BEACH LIQUOR RAIDS

Harry Sunnen, cook at the Salada Beach Inn, was arrested Monday night by Undersheriff Ed Farrell and Deputies Tom Maloney and Lawrence Neri. Sunnen was charged with violation of the Wright Act. Three gallons of liquor were confiscated.

Boys Suits for Graduation

Special Models—New Materials.

We prepared especially for the coming diploma days—not by setting a part of our stock aside for the occasion—but by bringing NEW suits in.

Stunning models—handsome fabrics—and if we have our way about it, the class of 1929 will be the best looking lot of youngsters you ever saw together.

Dad's bank account never shivers in this boys' department at any time—and the values in these new suits spring a pleasant surprise in the low prices of—

Court to Settle Child's Custody

The two-year court battle over the custody of Betty Nadine Anderson, 6-year-old adopted daughter of Mrs. Donald Harmenza of Redwood City, is expected to be settled with the rendering of a decision by the District Court of Appeals this week.

The court took the matter under advisement after a hearing Monday afternoon on a petition for a writ of habeas corpus filed by Frank Marshall.

Mrs. Harmenza claims that an agreement signed when she and Marshall were divorced in September, 1927, was procured through fraud. She alleges that she did not know that she was signing away her rights to Betty, whom she adopted before marrying Marshall.

Marshall received legal custody of Betty in Arizona in 1928. Subsequently Mrs. Harmenza "kidnapped" her adopted child and brought her to Redwood City.

When the case was up for hearing before Judge George H. Buck of San Mateo county he refused to take the child away from her mother but made no order. Upon his suggestion Marshall brought the petition in the District Court of Appeal in San Francisco.

Mrs. R. C. Frazier left Tuesday to spend the holidays with her parents in Auburn, Placer county.

Mrs. Joe Baughn has as her guest this week at her home on Birch street, her grandmother, Mrs. Mary L. Carter of San Francisco.

CAPITOL NEWS LETTER

By ESTO BROUGHTON

SACRAMENTO, May 29—CNB)—California's state fire patrol, charged with the protection of millions of acres of timber, watershed cover, grain and grazing lands, will boast 92 men in the field this summer, State Forester M. B. Pratt announced today.

With 66 men already on the fire lines, 26 additional soldiers of the fire brigade will go on duty during the next few weeks under the greatly augmented prevention program, Pratt said, to meet exceedingly hazardous conditions resulting from lack of rainfall and a "dry" year. The personnell includes 22 more than a year ago.

The fifth district, embracing San Mateo county, will be under supervision of Inspector E. T. Barron. No ranger has yet been assigned to the county, but adjoining Santa Clara County will be covered by Ranger Donald R. King, while H. R. Powers will man the lookout tower on Loma Prieta.

State Forester Pratt made the following statement at the opening of the fire season:

"Due to the liberality of the state administration and greatly increased co-operation on the part of the federal government, we have the greatest man-power to protect our fields and forests in the history of the state. The United States General Land Office alone, under a new agreement for the protection of public domain lands, has added 14 rangers to our force.

"It is imperative, however, that we have the fullest public co-operation this year if heavy losses are to be averted. The light snow pack on the mountains and the unusually light rainfall during the winter months threaten to bring about very menacing conditions. By mid-summer, in many sections, the forests and fields will probably be a veritable tinder box where a carelessly discarded cigarette, or an abandoned camp fire, would mean disaster. Every Californian owes it to his state this year, more than ever before, to be careful with fire."

The uniquely American buying scheme of self-service, often employing mechanical devices, and ranging from food and cigarets to shoes and gowns, is likely to harm the health of many people if it continues to include the purchase of eyeglasses without the advice of professionals versed in the science of refraction, it was said this week by Guy A. Henry general director of the Eyesight Conservation Council.

Henry announced a program of co-operation with better business clubs throughout the country to expose the dangers of using glasses obtained over the counters of some stores and from mail order houses without a preliminary examination by a competent optometrist, oculist or physician trained to determine defects of vision.

Sometimes a man suffering from eye strain or some serious error shops for a pair of glasses as casually as he would to choose a necktie. He has access to certain stores where he can paw over a tray of cheap glasses and "fit" himself, although he does not know what his eye ailment may be, what kind of lenses will correct it and what dire consequences may follow use of the wrong kind.

The clerk at the counter knows the price of the glasses so selected and he knows how to wrap them up. There his helpful service ends. He knows as little as the purchaser about diseases of the eye, refraction and methods of scientific examinations and adjustments.

Others, Henry said, get glasses through the mails from far-off firms who solicit patronage by circulars, canvassers and sometimes, he declared, by advertisements that get into certain classes of publications in spite of the warning by Better Business clubs that such advertising is questionable.

Mail order house packers are as skilful in choosing the right lenses to correct an individual's defective vision, the Council states, as the store clerk whose job begins and ends with accepting the price of the glasses and wrapping paper around them.

Very often, Henry said, ready-to-wear glasses bought in this dangerous fashion apparently improve the vision of self-fitting customers, while they may at the same time be doing irreparable damage. Bettered vision is not conclusive proof of correctly fitted glasses.

No mechanical device, he said, ever was invented to enable the unskilled to fit themselves to glasses correctly. A man needing glasses can get the right ones in only one way, he declared—by first getting a personal examination from one skilled in the science of measuring the eye to determine defects of vision.

Even if the lenses are correct, he said, they are worthless if not properly positioned before the eyes. The fitting of the frame holding the lenses calls for a special training, not known to clerks selling ready-to-wear glasses, and proper fitting is impossible by mail.

Home remedies, patent medicines, eyewashes and salves are likewise dangerous, Henry said, unless prescribed by a professional in the care of the eyes.

Besides the national movement to check fraudulent traffic in eyeglasses and in so called eye remedies, the Eyesight Conservation Council is striving to remove handicaps from industries caused by poor eyesight among workers and to help school children now being retarded in their studies by vision defects.

Among the leaders in its educational campaigns are James J. Davis, Secretary of Labor; John J. Tigert, former Commissioner of Education; Dr. Morton G. Lloyd, chief of the Safety Section, United States Bureau of Standards; Professor Joseph W. Roe, head of the department of industrial engineering, New York University; Professor Thomas D. Wood, Columbia University, and Dr. Charles H. Judd, director of the School of Education, University of Chicago.

SACRAMENTO, MAY 29—(CNB)—A heavy new crop of the political plum tree is being predicted today, with the budding hopes of many candidates already being revealed by statehouse seers.

First, comes the definite assurance from many sources that Governor C. C. Young will be a candidate in 1930 to succeed himself, although the the throes of the 30-day bill signing period has not expressed himself. But a close ally appearing as the spokesman of the Progressive faction of the Republican party, which put Young in office has declared: "Young must run again, he is the natural leader, and whether he chooses to run or not, we will draft him for the campaign."

Young will have opposition, but the picking of the strong opponent who will battle for the gubernatorial honors appears to be still on, with the field an open one.

Former Lieutenant Governor Burton Fitts was looked upon as a comer, but the turn of the political tide in Los Angeles, now makes it more problematic that he will lead the Anti-Young fight, according to word from the south.

Others being mentioned are State Controller Ray L. Riley, although it is unlikely he will run if Young is a candidate to succeed himself; Mayor James Rolph of San Francisco; Mayor George E. Cryer of Los Angeles; Warren Bovard, secretary under Governor Wm. D. Stephens; and former Governor Friend W. Richardson.

On the secondary circuit of lesser political stars a flock of new senatorial aspirants are appearing with the rural field opened up under the Farm Bureau Reapportionment plan.

Those considered certain of giving up their places in the lower house in favor of senatorial togas include: Assemblyman- Van Bernard of Butte City who has already announced he will run for the State Senate; Assemblyman E. G. Adams of Livingston who will choose to run for the Senate if at all in 1930 in a district where he has been thrice elected to the Assembly; Assemblyman Frank Mixter of Exeter; Assemblyman Jewett of Hanford; Assemblyman Chris Jesperson of Paso Robles; and Charles Reindollar of San Rafael.

SACRAMENTO, May 29—CNB)—Under the new $20,000,000 bond act submitted to the voters by the 1929 Legislature, the veterans of San Mateo County, who have stood in the waiting line for state loans for homes and farms will be cared for, George Stout, secretary of the Veterans Welfare Board, announced today.

With former bond issues totaling over $32,000,000 exhausted no more loans can be made until new funds are made available. San Mateo County veterans have shown a disposition to take advantage of the opportunity to buy a farm or a home of their own some 157 having been financed in the purchase of either a home or a farm at a total cost of $760,250.

SACRAMENTO, May 29—CNB)—"You are never too old to learn, and that applies to parents," Dr. Herbert Stoltz, director of the Bureau of Parental Education of the State of California, declared to day in encouraging mothers to study child behavior problems.

"The ability to learn is lost far less rapidly than is popularly supposed," said Stoltz, "and with age comes added ability to reason.

"The new philosphy of education is to use what you know rather than to merely gain more information," asserted the educator. "Parents know enough to train their children, the difficulty is in applying what they know of child rearing to the particular problem before them."

Rebuilt Pacific highway being oiled for 18 miles between Iamoino and Siskiyou-Shasta County line.

San Anselmo—Construction started recently on post office building.

25 Years Ago

Times-Gazette, May 28, 1904

Immediately after the close of school Frank Thompson and Leslie Mullen will depart for Montrio, Sonomo county, where they will spend the vacation months.

The Misses Beeger entertained about thirty of their friends at a tally-ho party Monday night. The party was driven to San Mateo beach in Cronk's five-seater. The evening was very pleasantly spent.

Miss Clara M. Shelley was called to Berkeley Monday by the serious illness of her old friend, Mrs. J. B. Smith. Mrs. Smith was a former resident of Redwood, her husband having owned the first butcher shop in town and which was located at the same place that Hind & Langley now occupies.

A parlor of N. D. G. W. will soon be started in Palo Alto, and among its members will be the first white baby born in Monterey.

William Hughes last week concluded a deal with Laban Langley, whereby the latter has purchased all o f Mr. Hughes' interest in the Hughes mill west of Woodside. Mr. Langley will commence work next week and will cut timber about the old Sampson mill. Enough good timber is standing to keep the mill running for three years.

Keep Milk Cool, Doctor Advises

"Milk at all times is one of the best possible foods for the child," states Dr. Herman N. Bundesen, president, American Public Health Association. "But during summer weather, the milk supply must be watched carefully. Probably the greatest cause of intestinal disturbances in childhood is the use of spoiled milk. In most cities milk is safeguarded, both through testing cows and thorough pasteurization. But all such care along these lines will do no good unless the milk is handled properly after it reaches the home.

"It must be kept in a cool, clean place and the bottles must be kept covered and free from contamination. It is wise to get a fresh supply of milk for the younger child each day. For children up to two years of age, the milk should be brought to a boil before using. Handle milk properly and it becomes a good food with no element of danger.

"Other foods, such a fruits and vegetables also spoil quickly in the summer time. Food spoils because of the action of bacteria upon it and hot weather favors bacterial growth. A good ice box, well supplied with ice, is one of the best health measures in hot weather for young and old."

The Sisters of Notre Dame wishing to reorganize the Alumnae of Notre Dame Academy cordially invite all graduates of Mt. Carmel School to attend the first meeting, which will be held at Notre Dame Convent, Saturday, June 1, 1929, at 4 o'clock.

Napa — Plans progressing for establishment of municipal airport.

Amalgamation Act Declared Bad For San Mateo County

It is quite probable that the enabling act passed by the houses of the legislature, and which would make possible the joining of this county to San Francisco, will be vetoed by Governor Young. A recommendation that it be vetoed was sent to the governor at the request of the board of supervisors of this county, following a [illegible] called to consider the [illegible] week.

The meeting was called at the request of Governor Young, who stated that he would withhold signing the measure until he had received a recommendation either for or against it from the supervisors of this county.

It was the opinion of the supervisors that such a measure was not for the benefit of the county and they recommended that it be signed.

JUNE TOILET GOODS SALE

$1.50 Bottle of Delicate Shari Perfume
GIVEN AWAY
with every purchase of a $2.50 box of
Shari Face Powder
Three Tints, Naturelle, Rachelle and Blanche
BOTH FOR **$2.50**

ESSEX

Smashes Record

66.86 Miles an hou for 18 hours!

HERE'S convincing proof that "you can drive an all day long at 60 miles an hour!" And proved here in California, under such exacting conditions silence any question regarding the superiority of

Nearly 67 miles an hour for 18 hours—elapsed time bucking the heavy wind and the tortuous heat of Mojave Desert! 1203.48 miles in 18 hours with only stops of fractionally more than a minute each for ga and water.

Intense dry heat and wind, that at times amounted veritable gale, combined to make this one of the se tests to which any automobile was ever subjected.

Northern California Essex distributors planned this to prove conclusively to California motorists what themselves already knew so well—that "you can dri ESSEX The Challenger all day long at 60 miles an ho They wanted to prove, too, that this 1929 ESSEX be driven 1,000 miles in faster time than any stock listing under $1,000 at the factory, competently time observed, has ever been driven before.

They selected a strictly stock car, amateur drivers and interested automobile editors to time and observe endurance run.

The Challenger accepted the challenge and came thr with such wide speed and mileage margins as to inspire admiration of all motordom.

66.86 miles per hour for 18 hours!

1203.48 miles in 18 hours, elapsed time!

There is no known record, competently timed and served, in the ESSEX price class that even fairly pares with this.

WHEN RECORDS FALL

Car—Essex the Challenger Stock Sedan.
Place—Muroc Dry Lake, Muroc, Mojave Desert, California.
Course—Surveyed five-mile dirt track, level and unbanked.
Elapsed Time—18 hours.
Distance—1203.48 miles.
Speed—66.86 miles per hour.
Drivers—B. M. Sharpe, David Gannon, Jos. Stacy, amateurs and regularly employed by Stanley W. Smith, Inc.
Timers and Observers—San Francisco, Oakland and Fresno Automobile Editors.
Auspices—Northern California Hudson-Essex distributors: Stanley W. Smith, Inc., San Francisco; T. P. Shelton, Inc., Fresno; Arnold Inc., Sacramento; and Normandin-Campen Co., San Jose.
Using—Veedol Motor Oil, Associated Ethyl Gas and Goodyear Tires.
Previous Record—For cars listing under $1,000, factory, the previous record known for stock sedan is 1,000 miles averaging miles per hour.

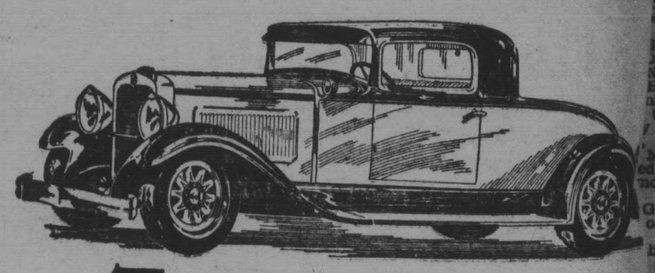
NASH "400"

Leads the World in Motor Car Value



3 Coupés

STANDARD SIX	SPECIAL SIX	ADVANCED
Delivered, Fully Equipped	*Delivered, Fully Equipped*	*Delivered, Fully E*
$1066	$1463	$202

Lower, Delivered, Completely Equipped Prices

NASH engineers have created a group of three striking Coupés.

For business, the small family, or as a second car the Standard Six Coupé is easily the choice of the $1,000 field.

It is powered by a Nash-designed, high-compression, 7-bearing motor.

A particular asset of this Coupé is its riding ease achieved by alloy steel springs individually designed to its exact size and weight, plus Lovejoy hydraulic shock absorbers.

An outstanding feature of the Special and Advanced Six Coupés (*both of which have big rumble seats in the rear deck*) is the Twin-Ignition motor.

These larger models also have the famous Bijur centralized chassis lubrication, and hydraulic shock absorbers (Lovejoy and Houdaille).

All "400" models are fully factory equipped with front and rear bumpers, hydraulic shock absorbers, spare tire lock and tire cover. In your delivered price there's not a dollar added to the factory price for these features.

Compare fully equipped, delivered prices on other cars and see how much is added to their factory prices to cover these same features.

Delivered, Fully Equipped, Price Range on 25 Nash "400" Models, $1071 to $22

REAL ESTATE FACTS

The junior class in a Port Huron, Michigan high school, was asked recently to list the items it considered necessary for a home. When these students finished their modest calculations it was found that the kind of homes they though they required would cost not less than $35,000—a figure by the way that was out of reach of the entire group.

"False ideas of what is essential for a home has kept many people from owning the roofs over their heads," says the National Association of Real Estate Boards in its weekly lesson on real estate matters.

Some people, like the Michigan high school students contemplating home ownership, think they must have sunken baths, frescoed ceilings and expensive outlooks. Although they live in modest quarters when they start their figuring, such folks get a total on pretentious dream homes and are frightened out of home ownership sometimes forever.

People should realize that limited incomes cannot purchase homes that resembles the palaces of movie stars, but that one can begin in a modest way and add expensive features later if budgets so permit.

"The public needs education on how to judge what they must have in their homes, bearing in mind, of course, that what seems essential to one family is not important to another," say James S. Taylor, director of the U. S. Division of Building and Housing.

This government division, that is occupied with housing and allied problems, is making a study of trends in home building with a view to compiling a list of essentials that will include the sizes and shapes of houses and how they are financed in cities in various parts of the country.

What They Build Elsewhere

Publicizing what other people think is essential in homes may bring about new standards in housing, says Mr. Taylor, as the rank and file of people have not the slightest idea what kind of roofs are used in adjoining states and whether or not breakfast nooks are popular down south. On the other hand, reports of what is in vogue in other cities may just make people cling tighter to their own pet "essentials," admits Mr. Taylor, but whatever may come of it, the Housing Division wants to know what the trends are.

Naturally the government or no one else would be so foolish as to take such a list and tell home builders to follow it, says Mr. Taylor. When the Port Huron high school class turned in lists that contained items they could not possibly afford, the instructor who evolved this problem then had the students go over their papers and eliminate items until they had brought the cost of their homes down to a figure they might be able to pay. The weighing of items certainly gave these young people training that many prospective home builders should have. It gave them judgment in evaluating the essentials for home construction from the individual point of view.

The Housing Division hopes that its survey will do for the country what the novel problem in arithmetic did for the Michigan high school students.

Mr. Taylor believes it will be a good thing for professional builders as well as individual home builders to know what kind of houses are being built in adjoining states, down South or out West.

Gathering Material for Builders

"In other lines of business men go about the country and study what their competitors are doing and some big builders are able to do this," says Mr. Taylor, "but most of the men engaged in constructing homes cannot afford to travel around to pick up ideas and the Housing Division survey hopes to do this for them."

Mr. Taylor does not expect the facturers of equipment and materials used in home building will be interested in the findings of his survey. Reports will be made on the trend of a city to warm air or steam or oil heating and such information, which would be difficult and costly for the average manufacturer to secure, may influence his entrance into such a territory.

"If a manufacturer of steam apparatus learned that cities in a certain area were 'warm air' cities, he might decide to leave this territory alone or he might decide to put on a big campaign to capture the business. At any rate it would be interesting to him to know the trend, "says Mr. Taylor.

Keeping Up With the Times

Mr. Taylor also points out that trends in home building are constantly changing and that any information business men might have on this subject now may be incorrect six months from now. The Division expects to keep this survey up to and issue reports periodically.

The survey will be very thorough and will detail the sizes of doors, the dimensions of common parts of houses, detached or semi-detached structures, construction processes, and selling methods.

Mr. Toylar does not expect the survey will reveal a "standard" house; rather that it will show a wide variation of "essentials" and methods in the cities where the study is being made. But it will give a bulk of material on which the public can work as the Michigan high school students worked, and items can be eliminated until individual essentials are formulated.

The Housing Bureau also hopes to use the most practical "trends" shown by the survey in building the demonstration houses undertaken by the Better Homes In America Committees whose work is one of the Division activities.

The women of Cautain H. J. Reilly Auxiliary No. 70 United Spanish War Veterans will hold a whist party Friday evening at the Garfield school. Admission will be 25 cents.

The women of Mt. Carmel Catholic church will hold a whist party Tuesday afternoon, June 4, at 2:30 at the Carmel Club rooms. Mrs. P. A. Ryan is in charge of the arrangements.

KIRKBRIDE & GORDON, Attorneys for said Petitioners.

BEFORE THE BOARD OF SUPERVISORS OF THE COUNTY OF SAN MATEO, STATE OF CALIFORNIA.

In the Matter of the Incorporation of Belmont County Water District.

PETITION FOR INCORPORATION OF BELMONT COUNTY WATER DISTRICT

To the Honorable, the Board of Supervisors of the County of San Mateo, State of California: .....

The petition of the undersigned qualified electors and registered voters of the County of San Mateo, State of California, residing within the boundaries of the proposed water district hereinafter described, respectfully shows:

That each and all of your petitioners are qualified electors and registered voters of the County of San Mateo, residing within the boundaries of that certain district proposed to be organized and incorporated as a water distrct as hereinafter mentioned, and are qualified electors and registered voters of and within the said district and within the said boundaries at the time of signing of this petition.

That the public necessity and convenience require the organization and incorporation of the water district hereinafter mentioned, and the undersigned desire to form, organize and establish such water district under and pursuant to the provisions of that certain act of the legislature of the State of California, entitled:

"An act to provide for the incorporation and organization and management of county water districts, and to provide for the acquisition of water rights or construction thereby of waterworks and for the acquisition of all property necessary therefor, and also to provide for the distribution and sale of water by said districts;" approved June 10, 1913, as amended.

That your petitioners propose that the said water district be formed.

That the said territory above referred to and hereinafter described consists of all that portion of said County of San Mateo, State of California, lying within the following described exterior boundary line which said boundary line constitutes the boundary thereof, to wit:

Beginning at the most northerly corner of that certain subdivision entitled "Town of Beresford Map No. 1," as shown on map recorded in Volume 14 of Maps at page 44 and 45, San Mateo County Records; thence southwesterly along the north westerly line of said subdivision to the northeasterly line of the right of way of the Southern Pacific Railroad Company; thence southeasterly along said right of way line to the centerline of Laurel Creek; thence along said centerline of Laurel Creek southwesterly to the most westerly corner of Lot 82, "Laurel Creek Farm," according to the map thereof, recorded in Volume A of Maps at page 65, San Mateo County Records; thence southeasterly along the southwesterly line of said Lot 82 and the southwesterly line of Lot 81 of said last named subdivision to the northwesterly line of that certain subdivision entitled, "Subdivision No. 10 of the Belmont Country Club Properties," according to the map thereof, recorded in Volume 15 of Maps at pages 29 to 38 inclusive, San Mateo County Records; thence following the boundaries of said last named subdivision in a general southwesterly direction to the most southerly corner thereof said corner being in the northeasterly line of lands of the Spring Valley Water Company, as described in deed recorded in Book 24 of Deeds at page 425, San Mateo County Records; thence southeasterly along the said last mentioned line to the northwesterly line of lands of the Municipal Properties Company as described in deed recorded in Book 191 of Deeds at page 171, San Mateo County Records; thence in a general easterly direction along the said line of said lands of Municipal Properties Company to a point where it is intersected by the line dividing Lots 57 and 58, "Maps of the Mezes Ranch near Belmont," as shown on the map thereof, recorded in Volume A of Maps at page 77, San Mateo County Records; thence northeasterly along said dividing line as extended to the centerline of Alameda de las Pulgas; thence southeasterly along said center line of Alameda de las Pulgas to the northwesterly line of that certain subdivision entitled "Devonshire Properties of Municipal Properties Company Subdivision No. 3," as shown on the map there recorded in Volume 12 of Maps at pages 56 and 57, San Mateo County Records; thence northeasterly along the northwesterly line of said subdivision and continuing northeasterly along the northwesterly line of subdivision No. 7 of said Devonshire Properties of Municipal Properties Company, as shown on the map thereof recorded in Volume 13 of Maps at pages 40 to 43 inclusive, San Mateo County Records and southeasterly along the northeasterly line of said last named subdivision to the northwesterly line of the Spring Valley Water Company 44.67 acre tract, as described in deed recorded in Book 41 of Deeds at page 509, San Mateo County Records thence northeasterly along said last named line and its production northeasterly to the northeasterly line of the Old County Road leading from Belmont to Redwood City; said road being that on the easterly side of the right of way of said Southern Pacific Railroad Company; thence along said line of said County Road northwesterly to the most westerly corner of Lot A, Port San Francisco, as shown on the map thereof recorded in Volume 16 of Maps at pages 26 to 28, Records of San Mateo County; thence following the northwesterly boundary of said Lot A northeasterly, northwesterly, northeasterly, northwesterly and northeasterly to the northeasterly line of the Rancho de las Pulgas; thence following said Rancho line northwesterly to the point of beginning; said San Mateo County Records being those in the office of the Recorder of said San Mateo County.

That the said proposed district is inhabited and that your petitioners estimate the number of inhabitants residing therein to be twelve hundred (1200), and that said number constitutes and is a true estimate of the number of the inhabitants residing therein and is the actual number of said inhabitants as nearly as your petitioners can determine.

That the name of said proposed district shall be "Belmont County Water District."

That the text of this petition shall be published for at least two (2) weeks before the time at which the same is to be presented to said Board of Supervisors in at least one newspaper published in such County, together with a notice stating the time of the meeting at which same will be presented. Any five (5) of the signers of this petition are authorized to give such notice and cause same to be published.

WHEREFORE, the undersigned respectfully request and pray that the above described proposed district may be incorporated under the provisions of the above entitled act as the aforesaid County Water District and that for such purpose this petition may be heard by said Board of Supervisors and that at such hearing or at any adjournment thereof said Board shall fix and determine the boundary of said district and shall thereafter call an election to be held in said proposed district for the purpose of determining whether or not such district shall be organized and incorporated.

Growth

THE whole universe is in a state of constant change. Everything about us, yes even ourselves and our community are undergoing a continuous change.

Most marked of all these changes is that of GROWTH.

Appreciation of growth can be understood by considering the development of our own town with that of other towns. A study of this development brings home to us, among other vital facts, this truth—**the measure of Community success is dependent upon growth.**

In other words, no community stands still—there are but two alternatives, the community grows and succeeds—or it goes backward and perishes.

Population alone does not determine the prosperity of our community any more than the weight of the individual determines health or personality.

Eminent physicians in referring to the physical condition of individuals tell us: "Your belt line is your life line—watch your belt line." By the same token experienced authorities on community development have cast into the discard the slogan "Watch Us Grow" for the more scientific phrase "Watch Your Growth."

Successful community growth demands the rate of increase in population be in proper relation to the size of the community. A normal growth, which allows this added population to become assimilated, welded, fused into the community life means that the community is in a sound condition.

A Message —
Increase in the number of its inhabitants is the best index to the prosperity and welfare of any body of people

Adam Smith
Founder of Modern Social Science

Let us not aspire to become just a bigger community, but to become a Bigger and Better Community. A town cannot be bigger until it is better, and it cannot be better until it is bigger. Let us remember that it is natural and normal for a community to grow—unless it does there is something wrong—something lacking.

The Larger the Town the Easier to Grow

Normal population increase over ten year periods.

TOWNS	
Under 2,500	3.0%
2,500-5,000	21.6%
5,000-10,000	23.4%
10,000-25,000	23.6%
25,000-100,000	33.0%
Over 100,000	34.0%

What is the normal growth of a community?

The answer to this question must be sought in the records of the development of all communities in our nation. Nor can it be answered by a simple statement, because community growth is complex and varies with geographical location, resourses, leadership and present size. However, the average growth is now 15% every ten years.

Let us all create a spirit and enterprise in our community that will bear fruit in the creation of a Bigger and Better town to live in.

This page is donated to fellow citizens by the undersigned who are all interested in the development of a bigger and better community. The Bigger the community the Better service we can render to our friends and neighbors of

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, with Bayer Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsilitis. Proven directions for its many uses, in every package. All drug stores have genuine Bayer Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming.

The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

HOW TO LIVE LONGER

By JOHN CLARENCE FUNK

FALSE ECONOMY

THRIFT is a splendid thing but when it reaches the point of miserliness it ceases to be a virtue. One of its most peculiar manifestations is the practice of keeping down blinds to "save the rugs." In the rural districts of some sections of the country the whole house will be shut up tight, summer and winter, "so that the carpets won't fade." Many city matrons in lesser degree are guilty of the same conduct.

Prisons of former years were both dark and damp; and they consequently not only confined those unfortunate enough to be sent to them, but killed them with disease. However, in these days of enlightenment even many jails are reasonably light, and get plenty of fresh air. Why then, emulate the penal practices of past years by saving the colors in rugs and carpets?

Germs are cowardly things. They love the dark and thrive in it. They are equally attached to dust. Conversely, they flee from sunlight, fresh air and cleanliness.

Physicians realize the fundamental fact that an abundance of sunlight is essential for normal development and the maintenance of a good physical condition. Drawn blinds bar it altogether.

While in many latitudes it becomes impossible in the winter time to keep the windows constantly open during the day, this need not be so during the late spring, summer and early fall. One thing is certain, winter will not keep out the sunshine if you are willing to let it in.

One step farther is required, however: window glass filters out the most beneficent portion of the sun's rays. It becomes necessary therefore, not only to let in light but to permit the sunshine to enter direct. In severe weather a few minutes is enough. In mild seasons one cannot have too much of it. Therefore, raise all blinds, and keep them up; then throw open the windows and let in the sunshine and fresh air. Better a little dust and faded colors than disease.

Be thrifty. But don't let thrift in this connection get the better of you. If you do, you will be a miser—perhaps a sick one. And you even may turn into a dead one!

* * *

A VICIOUS PEST

THE fly is one of the dirtiest insects in existence. It is a pity that it presents such an inoffensive appearance and that it lacks a stinger. If it were ugly and aggressive humanity's indifference to it would immediately change into opposing its dangerous activity. But that is where the trouble lies. The harm that it does is accomplished so slyly that the average individual is likely to become careless regarding this pest, especially if he happens to live in the country.

True, there is a great difference between the house of former days full of flies fresh from the barnyard and the comparatively flyless farmhouse of today. However, much still needs to be accomplished before this enemy to life has been laid low.

Typhoid fever is a disease of filth and uncleanliness. It is invariably contracted by taking food, water or milk which has been infected by typhoid fever germs. And it is right here that the innocent looking fly becomes such a powerful and deadly emissary.

This insect instinctively haunts unprotected cess pools and in this manner collects germs on its feet which it later deposits on food by the simple process of walking on it. Outside conveniences should therefore always be efficiently protected.

It is not always possible, especially on farms, to remove the barnyard products that are such a favorite haunt for the fly; but even there a certain amount of sanitary care and the efficient screening of one's house will diminish the hazard from that source.

Moreover, there is absolutely no excuse for anybody to maintain any fly-attracting spots in the immediate neighborhood of their dwelling. Exposed garbage and other filth magnetic to the fly should not be tolerated.

As to food (and this applies to city and rural folk equally) thoroughly wash uncooked foods such as lettuce, celery and endives. This mechanical process may remove fever infecting germs deposited by flies in the process of marketing this produce.

To conclude, the best kind of fly for human beings is a dead one. Do not tolerate conditions that breed and don't give him quarter if he invades your home. Swat—and live!

(©, 1929, Western Newspaper Union.)

The Self-Sufficiency Age

An obstinate, ungovernable self-sufficiency plainly points out to us that state of imperfect maturity at which the graceful levity of youth is lost and the solidity of experience not yet acquired.—Junius.

Camera Long Known

The camera, it is believed, was invented by Giovanni Battista della Porta in the Sixteenth century, though the principle was actually known before.

Onion Long in Favor

Native to southern Asia or the borders of the Mediterranean sea, the onion has been esteemed an excellent food from the earliest times, of which there are authentic records. Egyptians cultivated onions at the dawn of their history.

Complementary Qualities

Love must be intelligent, and intelligence must be loving before either can reach its fullest exercise.—Herridge.

Dog "Caddies" Used on English Golf Courses

Two dog caddies are to be found on the Bungay golf course in Surrey, England. Betty, a retriever, and Jill, a terrier, who are seen regularly on the links. They are owned by Walter Prime, the club professional, and between them they have retrieved over 10,000 balls. Members can take Betty or Jill with them on their rounds, and should they slice a ball into the rough the dogs will find it for them. Betty will follow the flight of a ball and at a word from Prime will set off in pursuit and lie down beside it without touching it, so that it can be played.

A spaniel belonging to Gordon Lockhart, of the Gleneagles club, has a remarkable faculty for finding balls. Lockhart employs his dog and a caddie when he is practicing, for he can drive ball after ball and rely on the dog to bring them all back.

Must Move Whole City to Reach Herculaneum

What to do with the city of Resina, the heart of which is exactly over the dead heart of Herculaneum, is the problem that is bothering the excavators of the ancient city. The excavations, under the direction of Professor Ventimiglia, have reached a point where the present inhabitants are in the way.

Fully 15,000 people are on the site of the city that was overwhelmed by the great Vesuvius eruption nearly 2,000 years ago. New homes must be found for them, property owners must be compensated, and churches, cafes and tenements must be carted piecemeal away.

Already Professor Ventimiglia is having houses at the edge of the city removed, one at a time, but the problem of the disposition of the heart of the city is still to be solved.

Glasses That Sparkle

If your glassware ever looks dull and streaked perhaps you have wondered how some people make it really sparkle. A tablespoon of 20 Mule Team Borax in the dishwater gives a crystal gleam to glassware and a lustre to china.—Adv.

City Changing Its Job

The city of Lowell, Mass., once the center of the cotton weaving industry, has adapted itself to the new order of things and is changing over to artificial silk. There are several large establishments which were once engaged in the manufacture of cotton goods that are now turning out rayon in large quantities. A study of the basic principles of rayon treatment was started in the public schools many years ago, with the result that many of its young people were familiar with the manufacture of rayon when they left school.

Accidentally an Arkansas lady cured fits in a valuable dog with Russ Ball Blue. Many others now use it. Never fails, she says.—Adv.

Voters Assorted

Portnocklie, Scotland, town of present political troubles because the citizens do not want to hold office, again came into the limelight recently when its system of naming its voters was revealed.

The Banffshire fishing community has a population of 1,700 of whom 560 are voters, and of the voters 141 are named Mair, 55 Wood and 33 Slater. To prevent confusion the system of "tee" names or "to" names exists, and an individual is best known by his "tee" name.

MENLO PARK

Roos Home Sold

O'Dell, the widely knwon banker, recently from Los Angeles, who purchased the Roos home last week is developing and improving the property. He is spending $10,000 in this development. The work is being done by Weeden Brothers.

F. E. Cain a Visitor

F. E. Cains, formerly a realty broker in Menlo Park, but now of Santa Barbara, was here yesterday. Mr. Caine bids fair to soon become a millionaire. He has an option on seven hundred acres of land in the oil belt along the Pacific Ocean, not far from Santa Barbara.

The city council met on Tuesday evening, a full board being present. No action was taken on the two bids presented for auditing the books of the city government. Gus Deickman offered to do the work for $85, while Robert E. Hammond of Atherton agreed to take the contract for $80.

A communication was read from Lee Sing and others living in the Oriental quarter complaining that Officer Feeley had ordered several of them to leave town and that he had continually harassed and annoyed them. The complainants said they had money in the bank and were not vagrants and were obeying the law in every particular. Dale demanded in a vigorous manner that some action be taken on the matter. Officer Feeley was directed to appear before the council at its next meeting on June 11 to answer to the complaint.

The resignation of Officer Joseph Walsh was accepted as of May 31. Bert M. Herring, son of Mrs. Wilbur, was named by the chief of police, for the position at a salary of $150 a month and the appointment was approved by the council, Dale and Weeden refusing to vote on confirmation, holding that the third officer was not needed.

J. J. Harcom, F. R. Cain and Frank Campbell, a committee appointed at the last meeting to investigate the blind streets and alleys in the municipality and report as to the procedure of opening them to public use, made a lengthy report. Harcom said that it would be well for the council to adopt a resolution of intention thereby preserving the rights of the city in that any improvements made there after would not a charge against the city in the event of the opening of the streets. Attorney Cain made a very elaborate statement showing careful study of the question. He said that the expense of opening these thoroughfares would be small, not more than twentycents per foot frontage. After the passage of the resolution of intention, condemnation proceedings could be started. He urged the work to be initiated as soon as possible. City Attorney Whitworth agreed to begin the work at once. A resolution was prepared and the city engineer directed to prepare the necessary map of the area in which the cul de sacks are located. It will take about 6 months to accomplish the undertaking.

On motion of Blake, seconded by Walker the chief of police was ordered to secure a Ford automobile for the police department to cost not more than $650. Both Weeden and Dale opposed the motion on economical grounds. A resolution was also adopted allowing the police department a sum not to exceed $35 a month for the upkeep and repair of motor vehicles.

The new police ordinance as amended was adopted, fixing the salary of the chief at $200 a month, and permitting him to select a number of assistants not to exceed six at a salary of $150 a month. Dale and Weeden voted no on the passage of the ordinance.

At the request of Fred Nessler, who addressed the council, the ordinance regulating the use of explosives within the city limits was modified so that the use of harmless fire crackers and explosives could be sold by the merchants in town on July 4th.

The resignation of city treasurer, John W. Ryan, was accepted, and C. H. Parks of the American Bank and Trust Company, was appointed to fill the vacancy.

Weeden was given further time to report on the lighting district. He suggested that the city take over the district. The city attorney was directed to look into the matter. Chairman Ellis made the suggestion that all the telephone and electric wire be put underground, at least those within the town proper, thus doing away with the hideous poles. This matter was also referred to the city attorney to report latter.

Dale, with fire in his eye, arouse and in a loud voice, wanted to know why the chief of police was not on duty on Sunday morning last. Dale charges for three hours the highway at the bank corner was not patrolled when little children were crossing the street on going to church. He further charged that the chairman and the chief were in conferenge in the back room of the city hall. Dale was called to order by the irate chairman, but Dale continued with his condemnation of the chief. Finally Dale's voice gave out and he sat down.

Walker reported that the tall weeds and grass outside the property line and on the public streets was a nuisanse. He suggested that a mower be secured for four or five days at a price not exceeding $12 a day to cut down the grass. He was given permission to have the work done.

The report of Building Inspector Harcom was received and filed. It showed that the sum of $81.70 had been collected during the month from new buildings started. The sum of $48 was received for building permits, $29 for plumbing and $14.70 for electric permits.

Claims agains the city aggregating $777.81 were passed and allowed by the council.

The council adjourned until June 11th.

AND GIRLS—HOW HE CAN LOVE!

MAURICE CHEVALIER in Paramount's all-talking, all-singing, all-dancing picture will play a three-day engagement at the Sequoia Theatre starting Monday. This picture comes direct to Redwood City for a first-run showing after four weeks in San Francisco.

Hudson-Essex Official Visits Local Dealer

Those who take the automobile industry as a business barometer will find plenty of optimism in the forecast of Courtney Johnson, general sales manager and director of the Hudson Motor Car Company, Detroit, who was here this week to visit E. G. Hinds & Co., Hudson-Essex dealer here.

Following the greatest quarter in the company's history—January to April—Johnson announced that the current quarter is far enough along to state without reservation that it will exceed, in every phase, the new all-time records set by 1929's opening three-month period. "This applies," he said, "to production, sales, liquidation of dealers' stocks and in net profits."

"We will build 120,000 cars this quarter," said Johnson. "What is more to the point, our dealers will sell them faster and more profitably than in any previous year. In spite of the huge increase in our production, there are 3,000 less cars in the hands of our dealers than at this time a year ago.

"This, I think, answers the question as to the general prosperity of the country. I hesitate to predict what the records will show for the last half of 1929, but we have every reason to look forward to a continuation of record-breaking business.

"You hear a great deal about the adverse effect that the unprecedented stock market speculation is having on business generally, about the unhealthy condition being created by the expansion of the chain store and the entry into local competition of the retail stores of the mail order houses. These are incidents along the highway of commercial progress and I believe their effect on business generally is exaggerated. There is plenty of capital available for sound enterprises. The nation's resources are being developed at a rapid rate. From a financial viewpoint, our dealers' business is being handled on a much cleaner basis. There are fewer long-term purchase contracts. Collections are uniformly better and the smaller dealers, as a rule, are in a far better financial condition than they were a year ago.

"It is true that this is a highly competitive year. The mortality rate among poorly managed businesses—and this includes producers as well as seller—will be high, because the public is in a critical buying mood. But the failure of weaklings cannot be attributed to unhealthy conditions. In fact, the country is unusually sound economically.

"Detroit is a literal beehive of industrial activity, knowing a prosperity that has seldom been recorded. We are turning out an automobile every 16 seconds and shipping this daily production of 1,900 cars the same day they are made."

Johnson was pleased to learn that Hudson-Essex sales continue to be third among all cars in California for 1929, the same as last year, and congratulated the local organization on its showing.

Gus Risso, the considerate and astute income tax man, who spends much of his time in the course of his duty, at the courthouse, has just completed a $35,000 dwelling on Alvarado avenue Burlingame. It is near the home of his friend, Al McCabe, the political leader. Mr. Risso is a whole so waxed rich Bank of Italy and is now e on the sunny serves the best

Songs of Plain

Wonder

The little Elves of Wonder
Went bounding through my heart,
Rolling hoops of laughter
When life was new to me;
Now that the years have harnessed me
Unto a dollar-cart,
I see them dimly when the moon
Is swinging in a tree.

I hear them faintly and afar
As echoes in the night,
When sometimes from a Winter dream
I waken with a start
To gaze on crystal snow and star,
And then — to my delight —
The little Elves of Wonder
Go trampling through my heart.
